Suggested Equipments

Hand pallet jack

Forklift with load capacity 1 ton

Step ladder

Required Tools

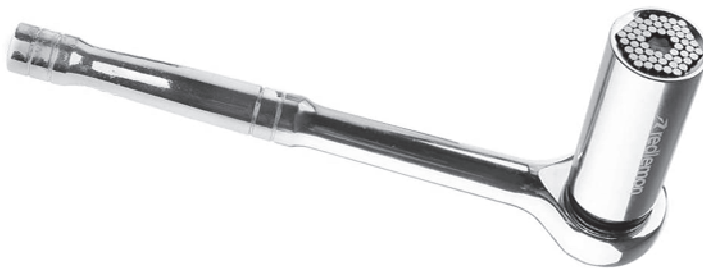

Scissors

Hex key 1/4"

Cutter

Ratchet and socket 9/16" and 1/4"

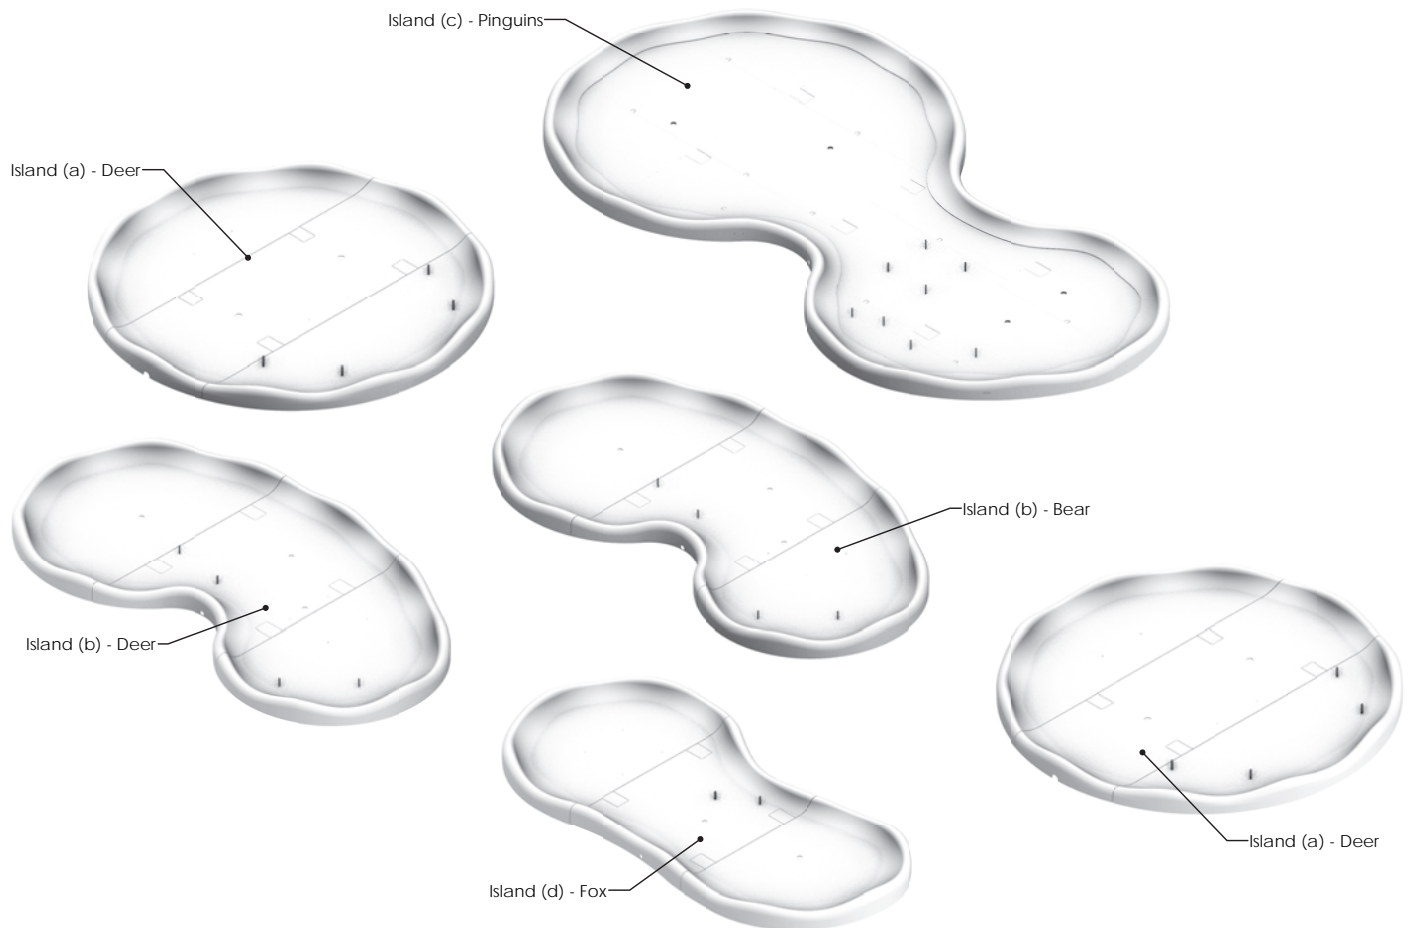

Cordless drill

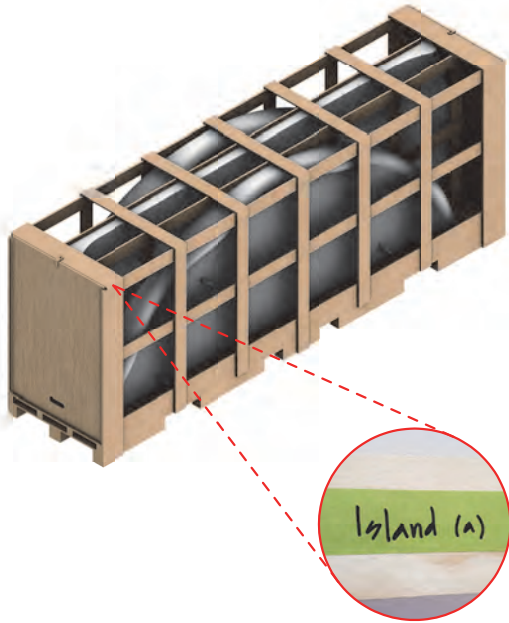

Chapter 1

Islands

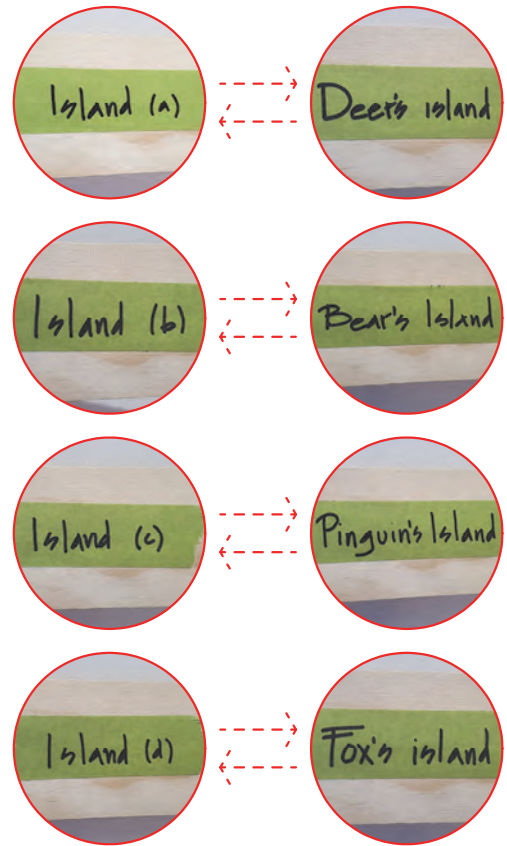

Start to assemble the island
Identify the island

01

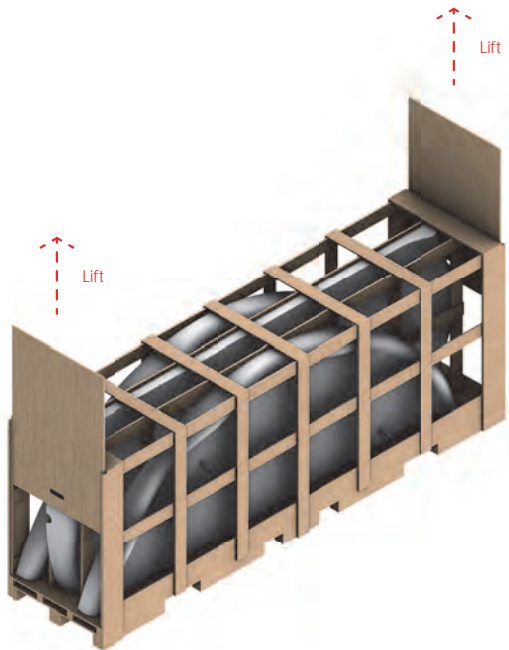

Each wooden box includes a tape that indicates the element it includes

02

Unlock and lift up the doors of the wooden box

03

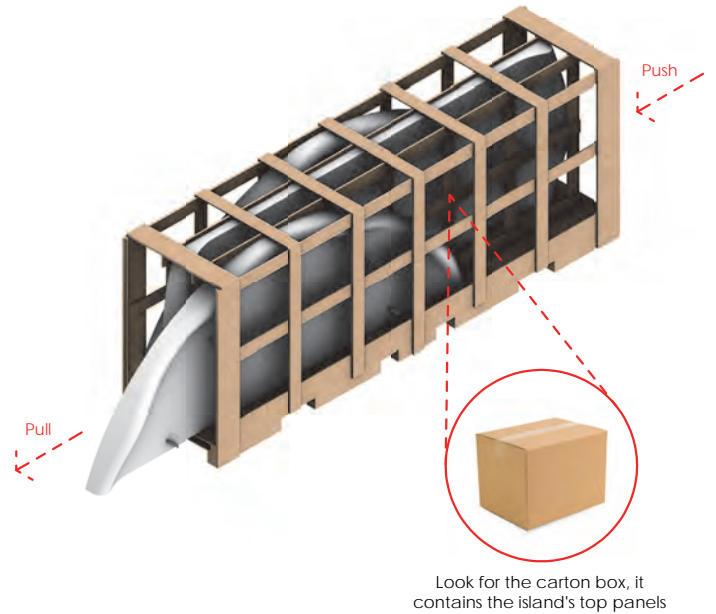

Required team
3 members

Push and pull forward the parts of the island out as illustrated, then carefully remove all the plastic using scissors/cutter

04

Required tool
Scissors

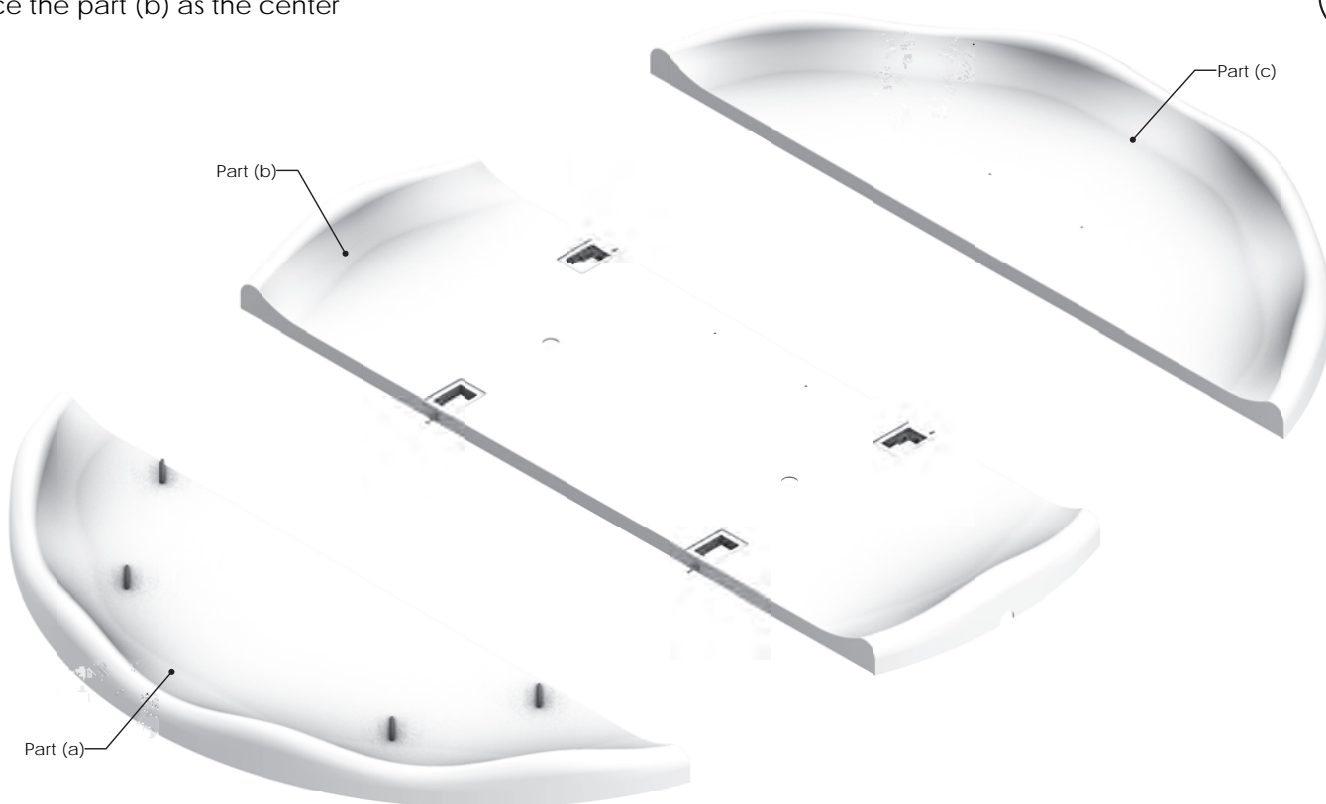

Required team
3 members

Identify the three parts of the island following the image
Place the part (b) as the center

05

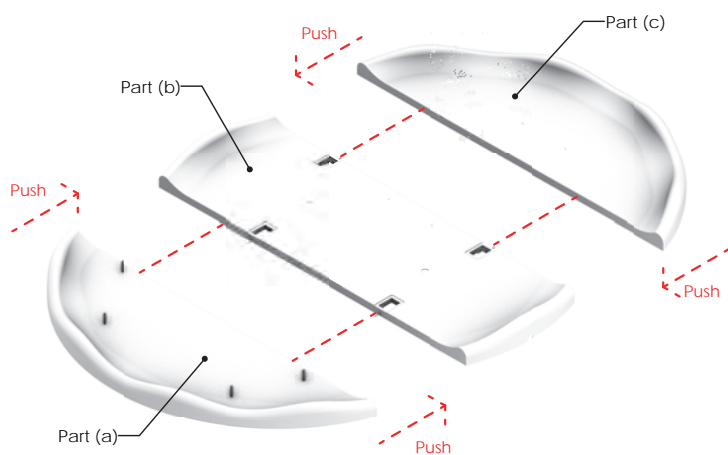

Insert the parts so they can
match with each other

06

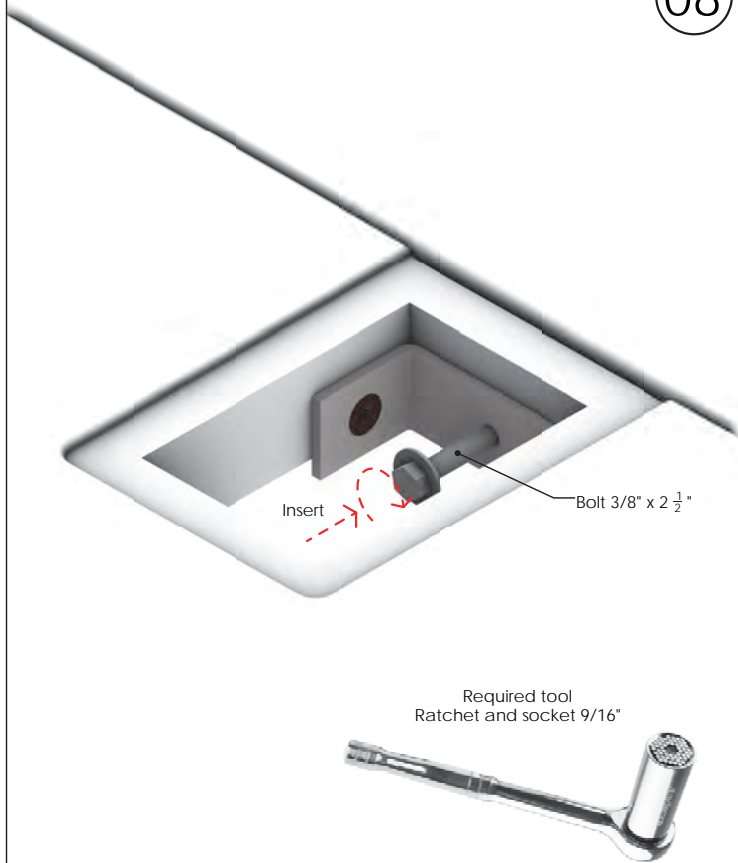

It's mandatory to verify the island is correctly
positioned in order to secure it with the bolts

07

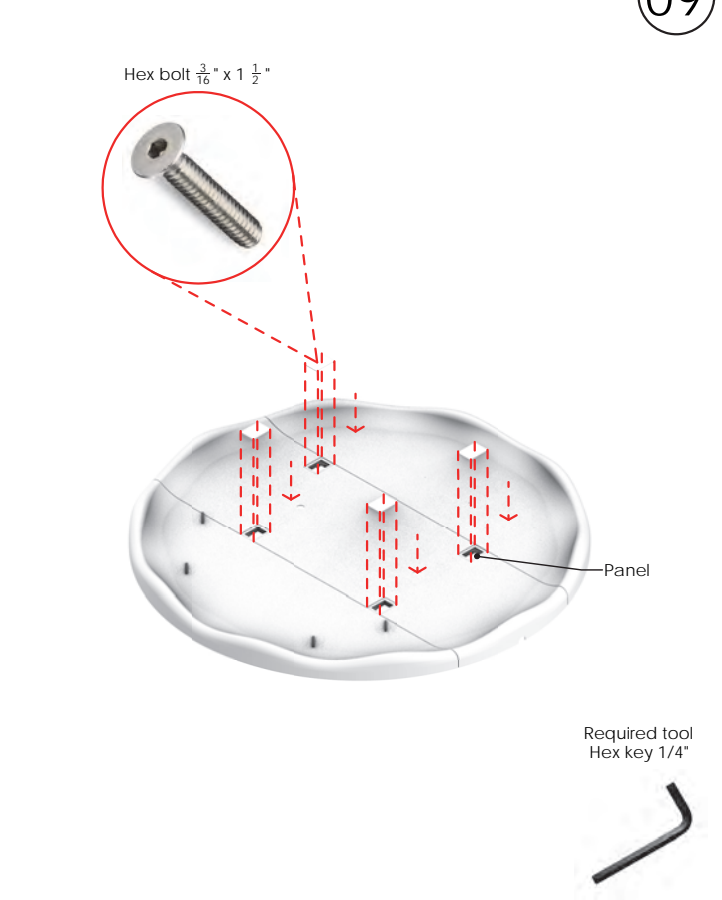

Insert the bolts

08

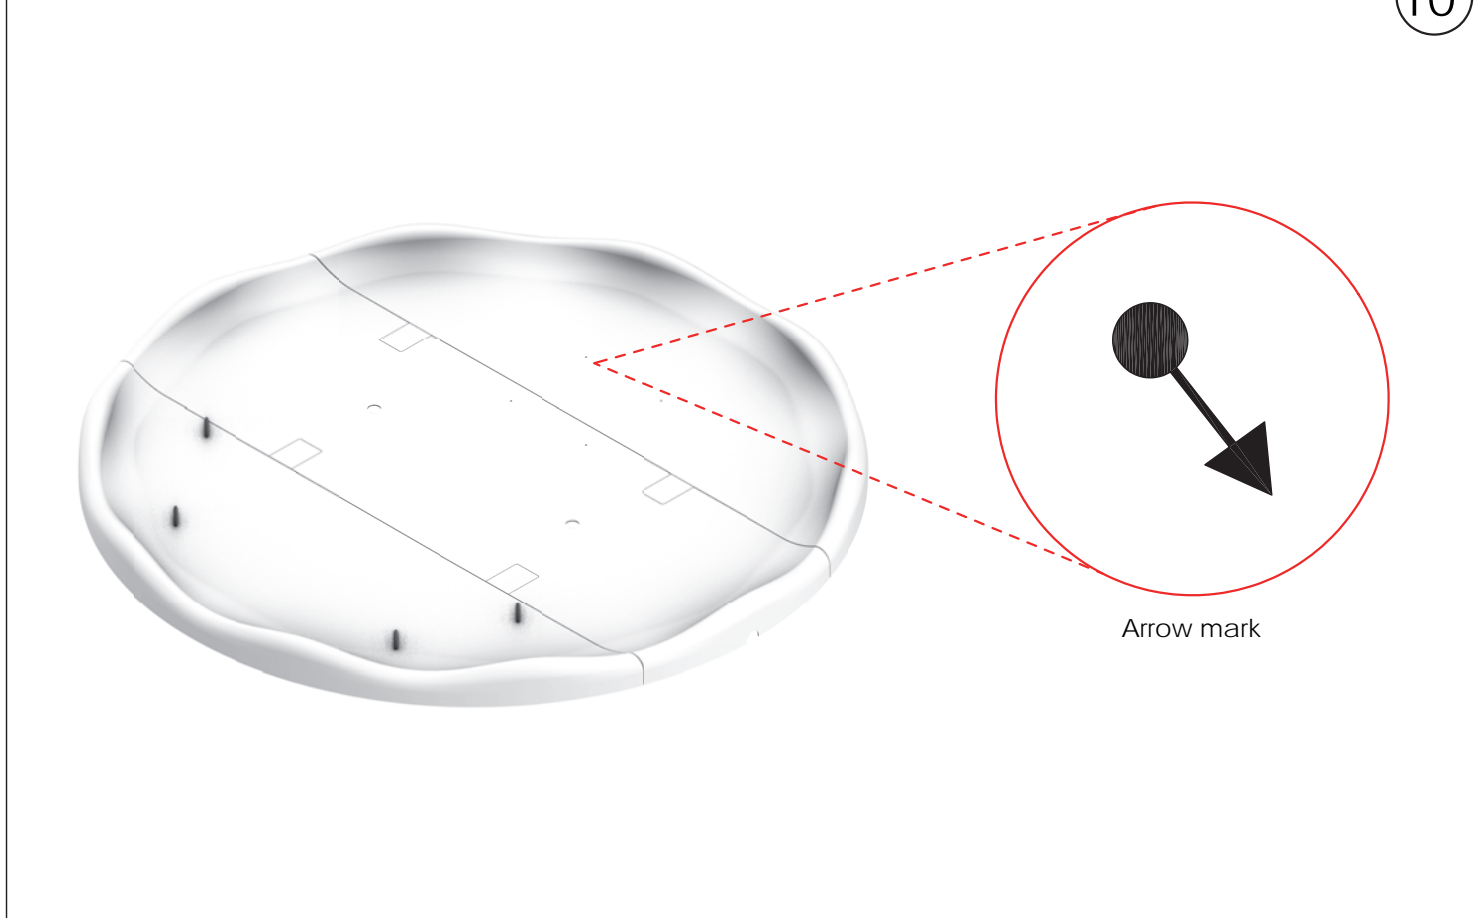

Close and secure the panels

09

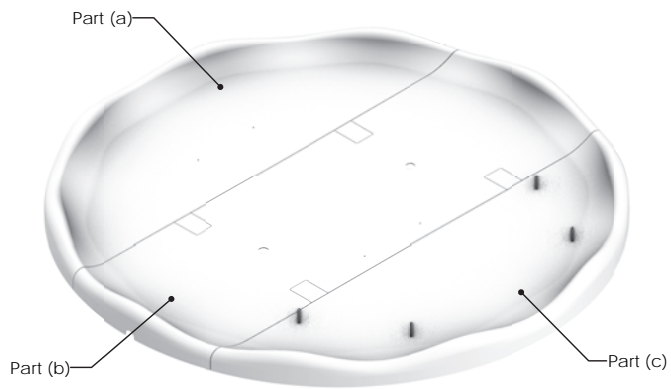

Look for the arrow mark that is essential for the correct placement of the sculptural tree

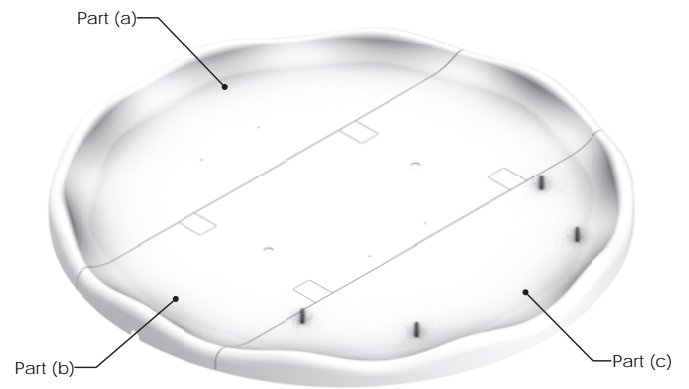

10

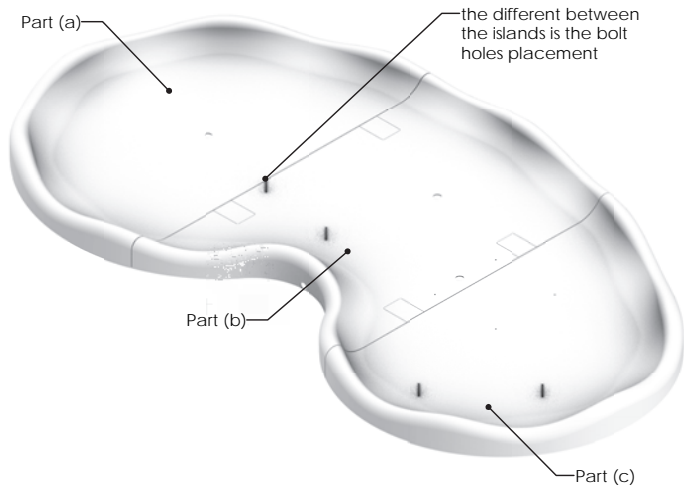

Island (a) - Deer

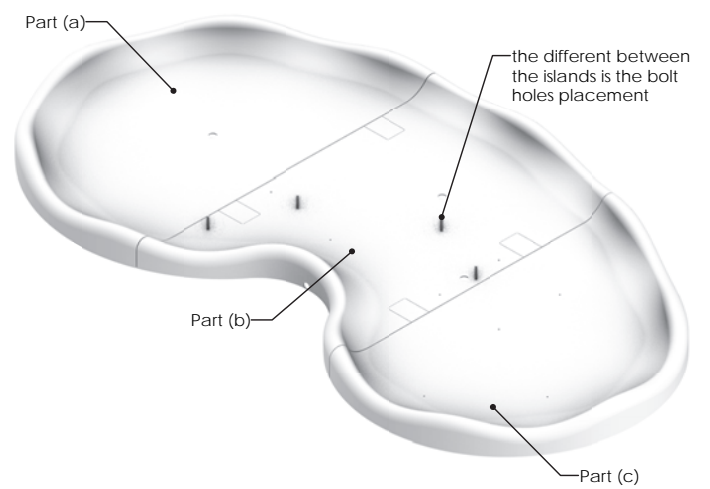

Island (a) - Deer

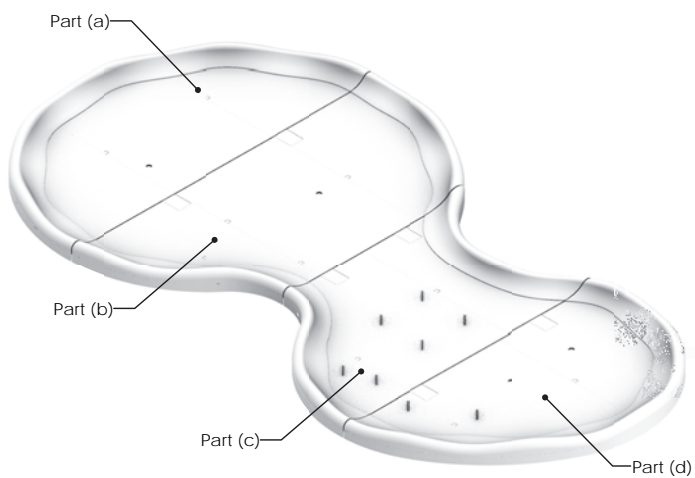

Island (b) - Deer

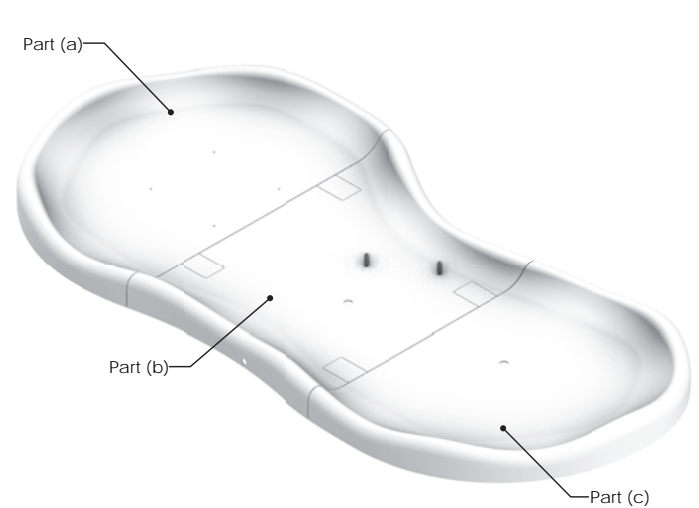

Island (b) - Bear

Island (c) - Penguin

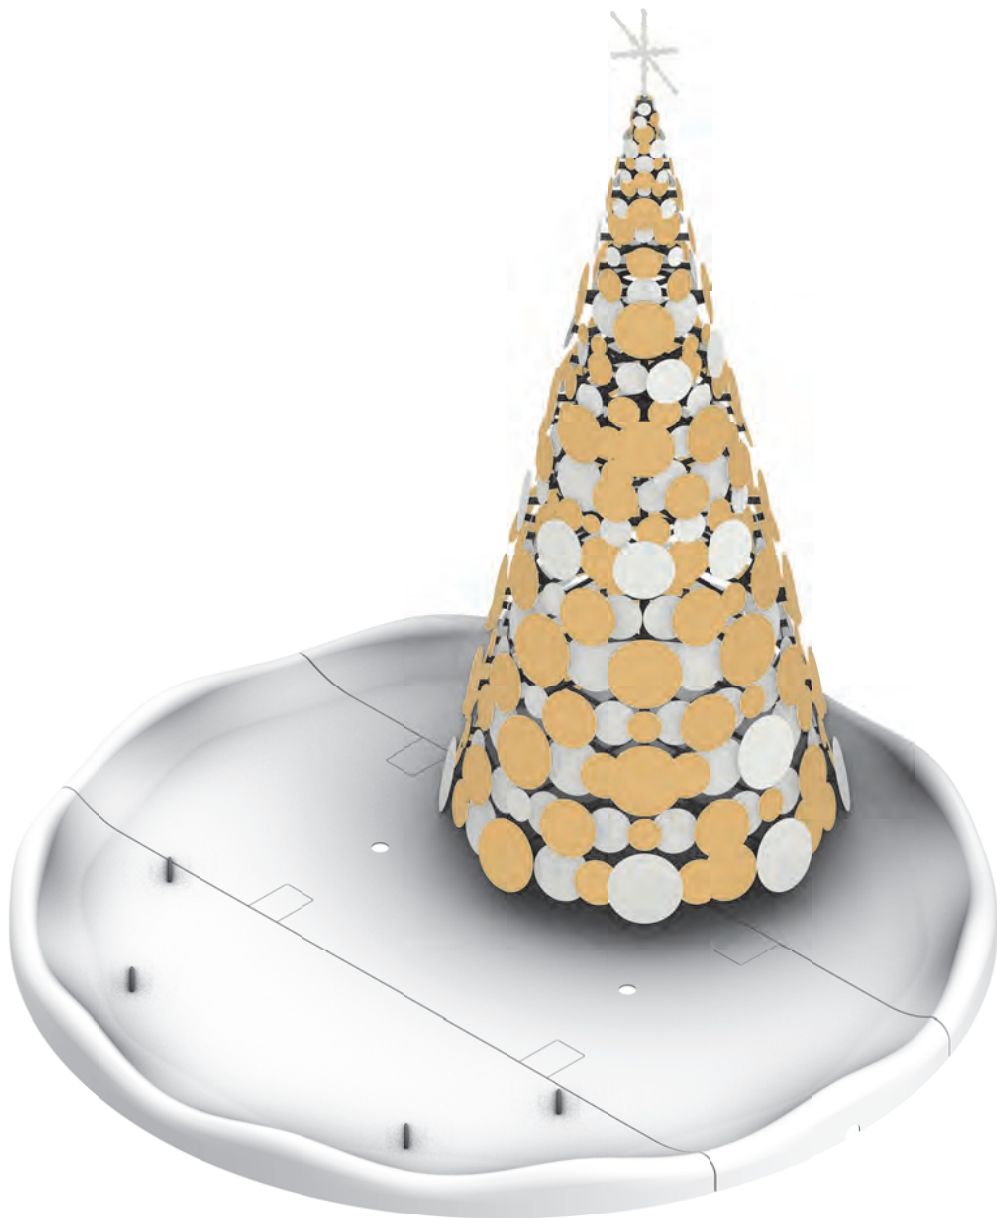

Island (d) - Fox

Chapter 2

Sculptural Tree

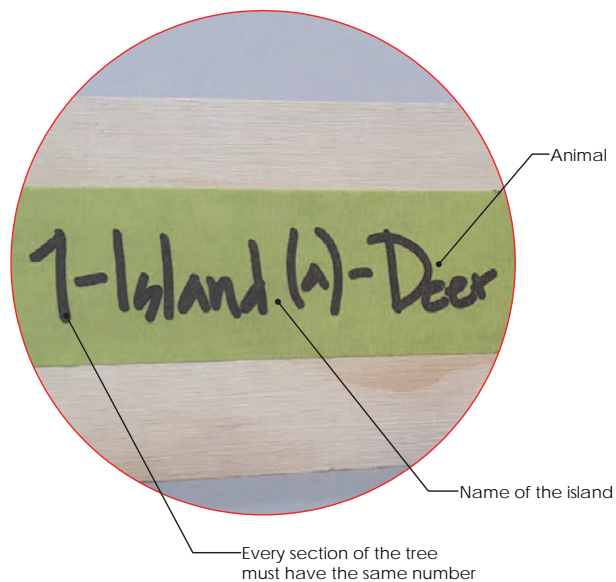

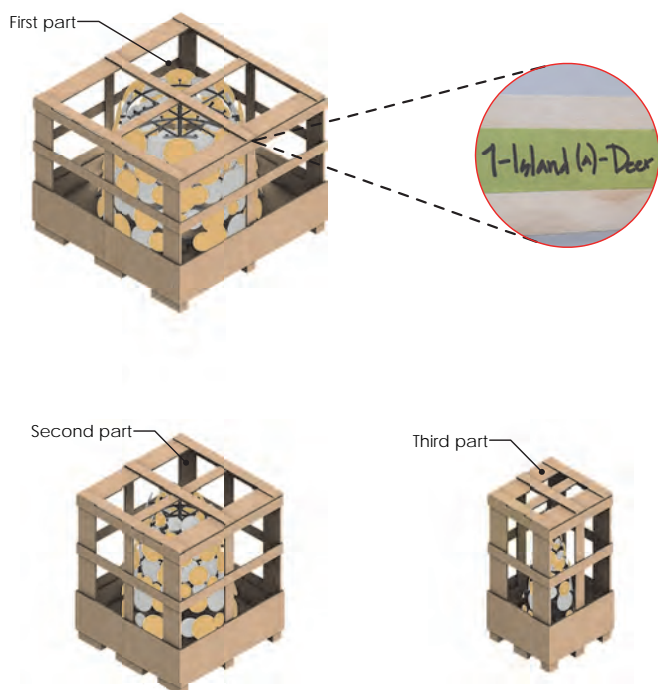

TROGOLO
THE JAMES TROGOLO CO.

To start the sculptural tree assembly, identify the parts of it

11

Each box of the tree includes a tape that has a specific code depending on the island and animal

12

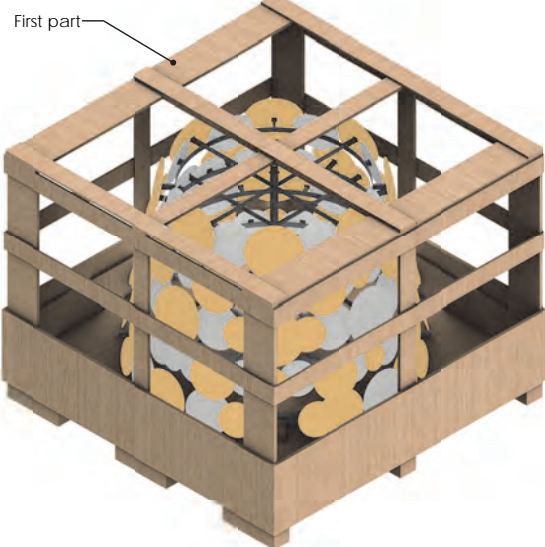

Carefully remove all the plastic of the first part using scissors/cutter

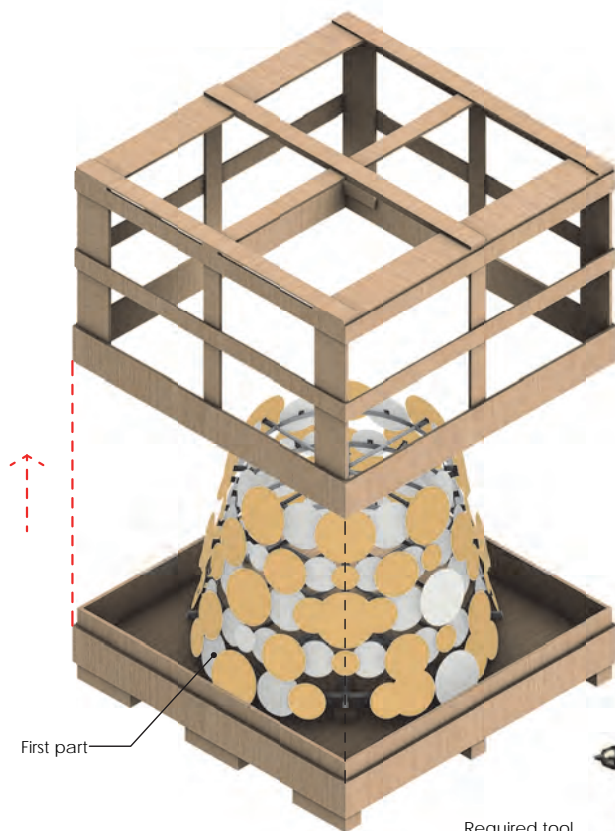

13

Unscrew and lift up the top of the wooden box

14

Required tool
Scissors

Required tool
Cordless drill

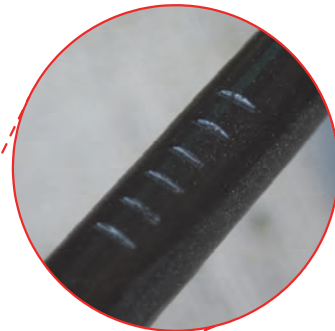

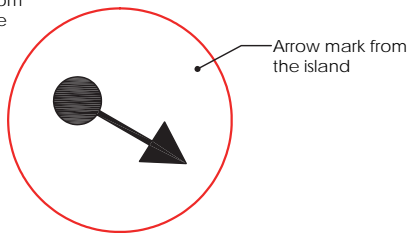

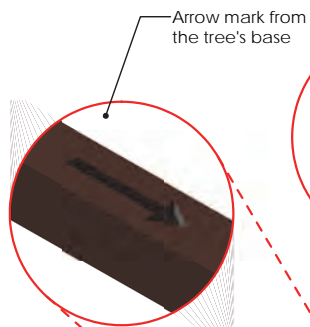

Unscrew the first part from the wooden base and look out for marks that serve as guidance for proper installation

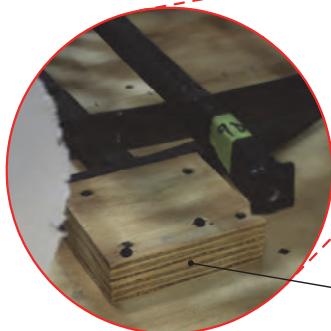

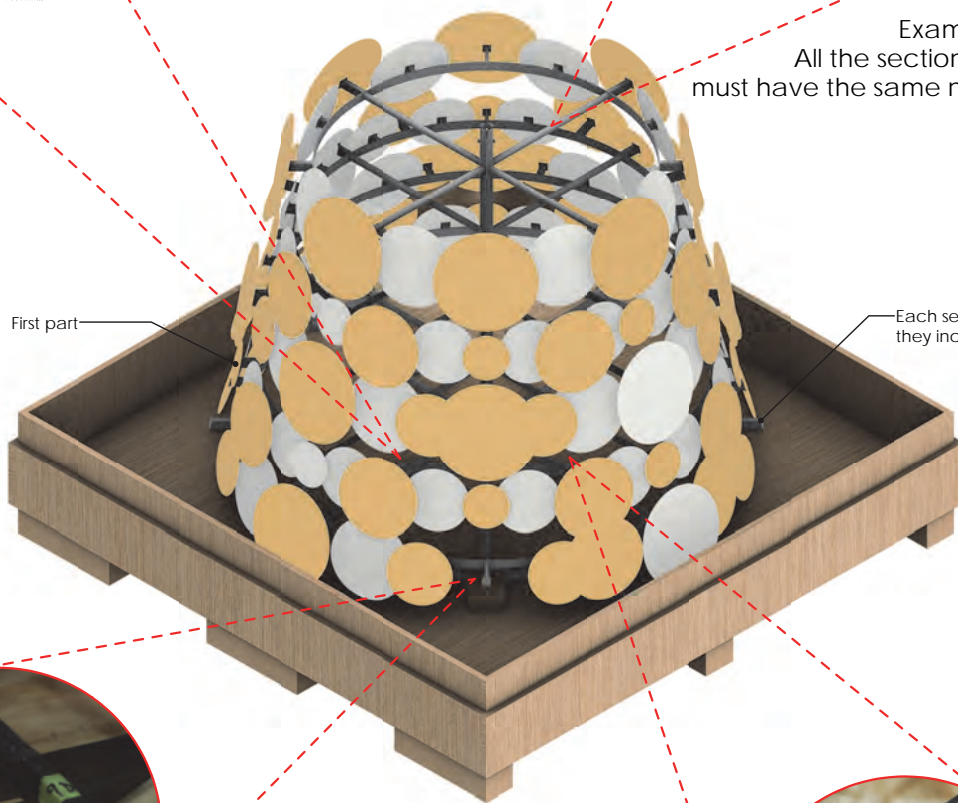

15

Island's arrow mark must match in direction and position with the tree's arrow mark

Each part has hash marks that serve as reference to which tree, you're assembling

Example:
All the sections of the tree must have the same number of hash marks

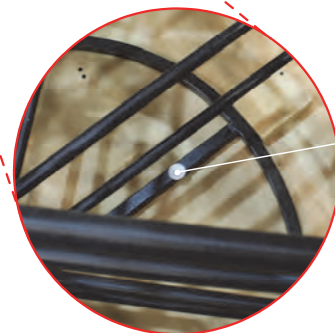

Wooden buttress

Unscrew all the wooden buttress

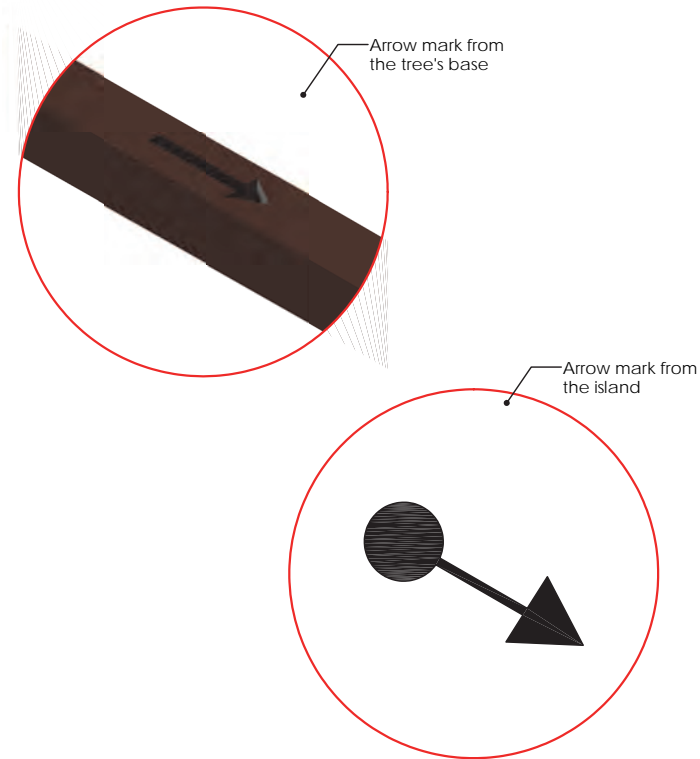

Required tool
Cordless drill

Unscrew the bolts located in the tree's base

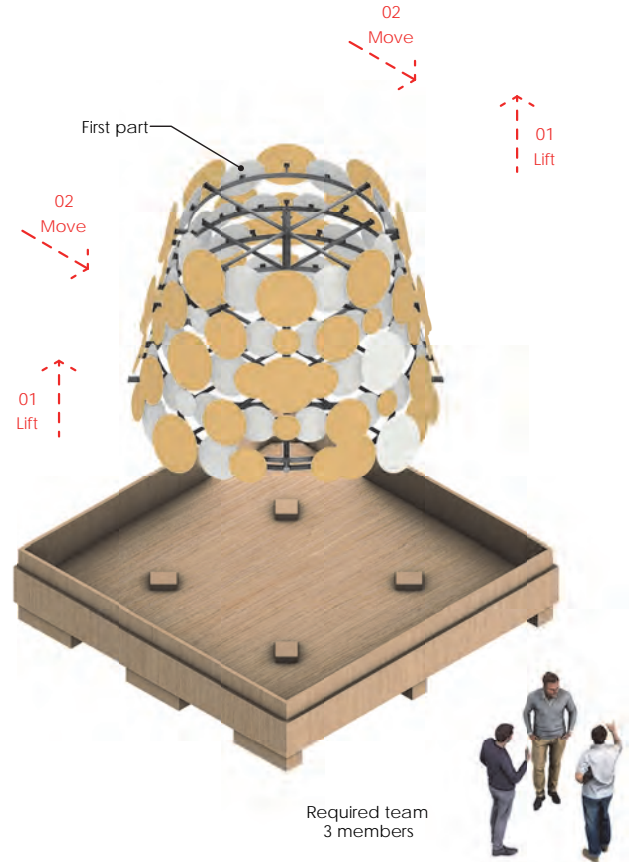

The island's arrow mark must match in direction and position with the arrow mark from the trees

16

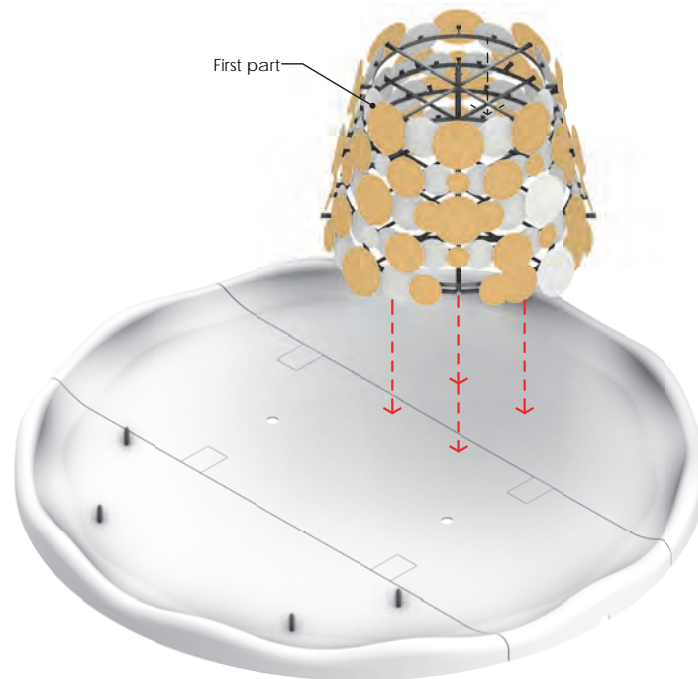

Using a tool, equipment and a group of at least 3 people carefully lift up the first part of the tree

17

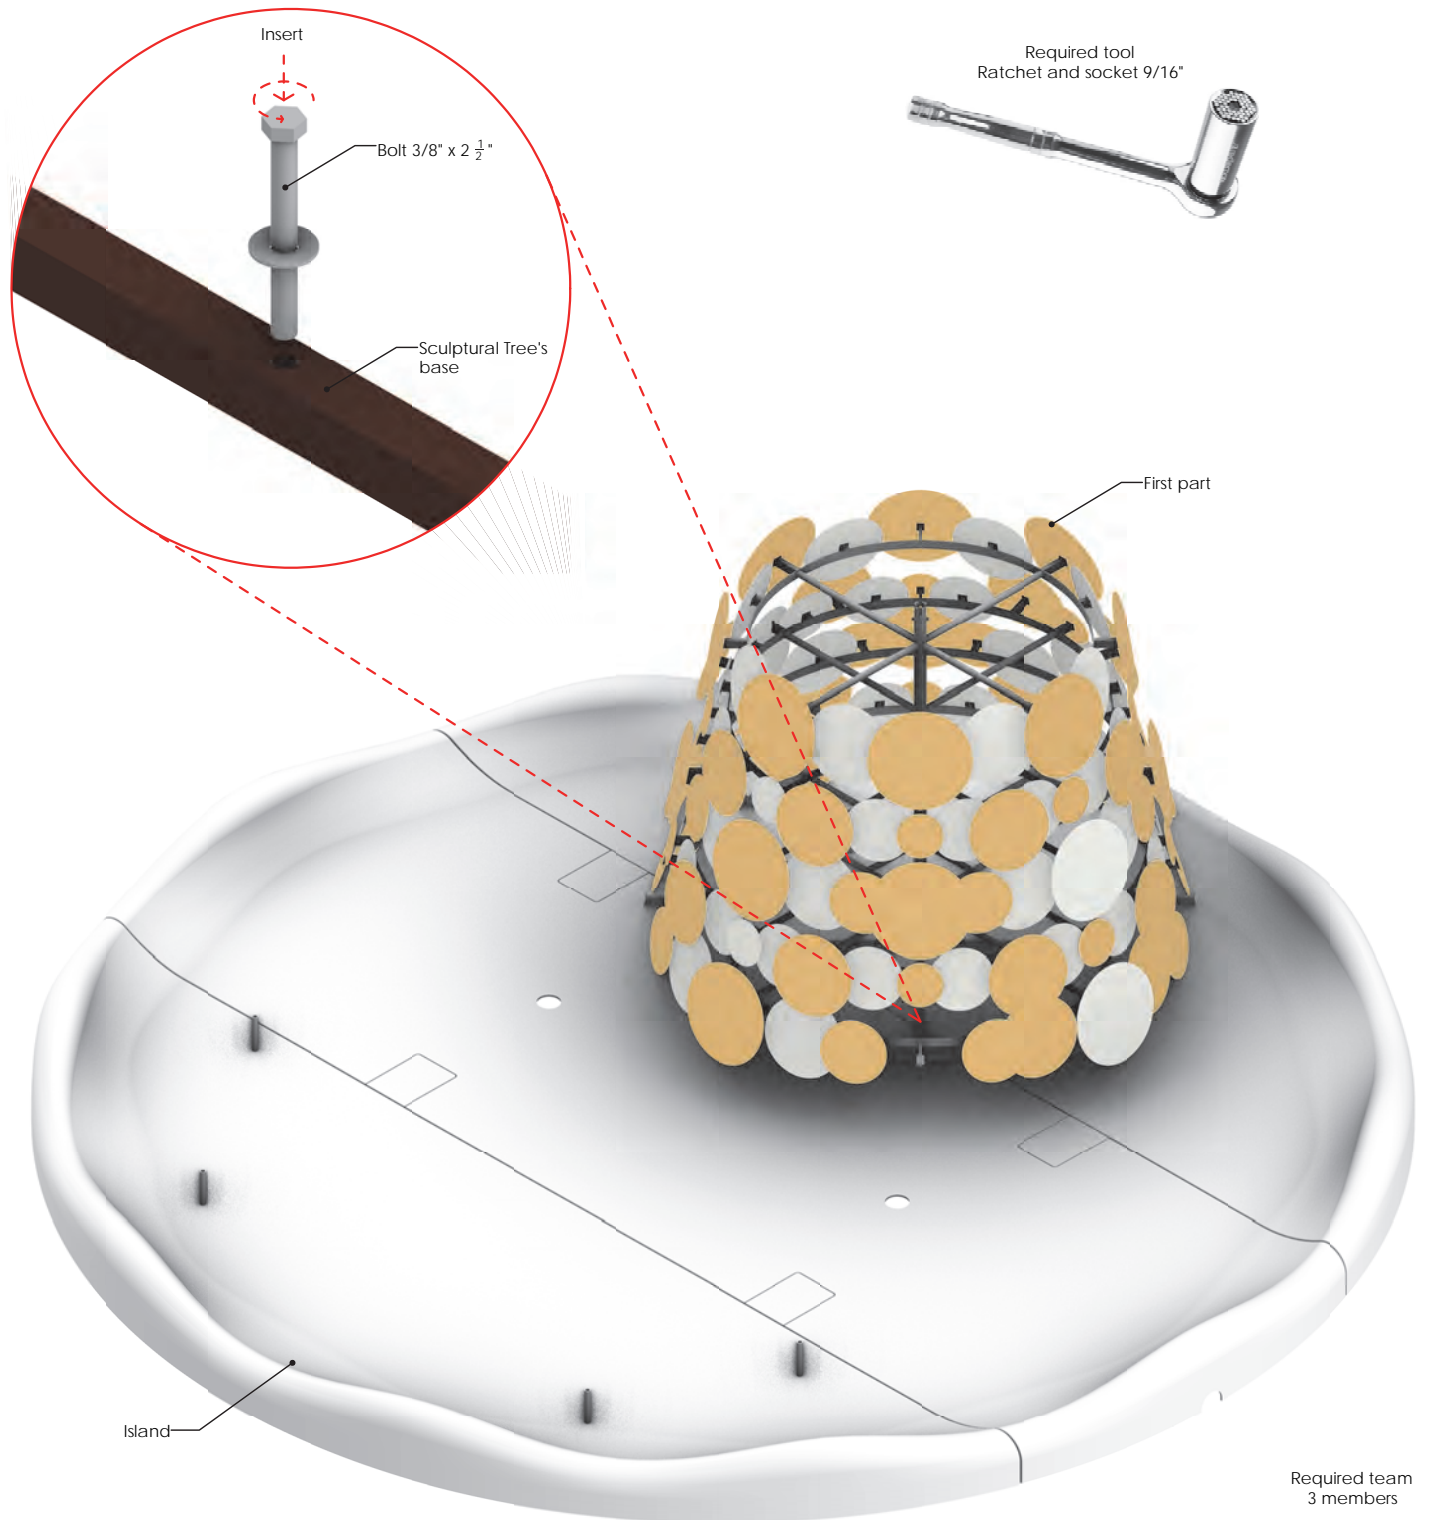

Lower the first part so that it matches the island's arrow mark

18

Secure the Sculptural tree onto the island and verify its stability

19

Carefully remove all the plastic of the second part using scissors/cutter

20

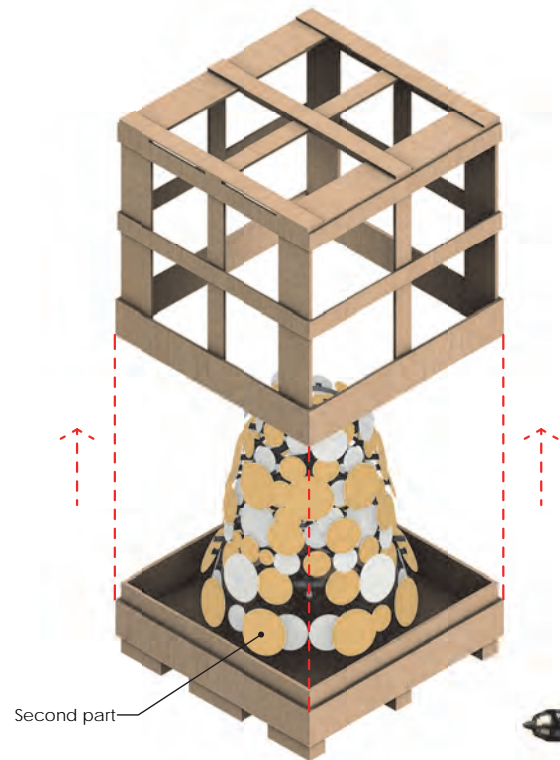

Required tool
Scissors

Unscrew and lift up the top of the wooden box

21

Required tool
Cordless drill

Unscrew the second part from the wooden base

22

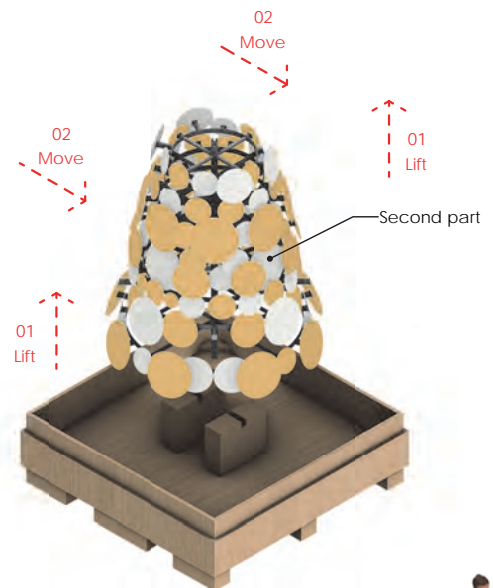

Required tool
Cordless drill

Using a tool, equipment and a group of at least 3 people, carefully lift up the second part of the tree

23

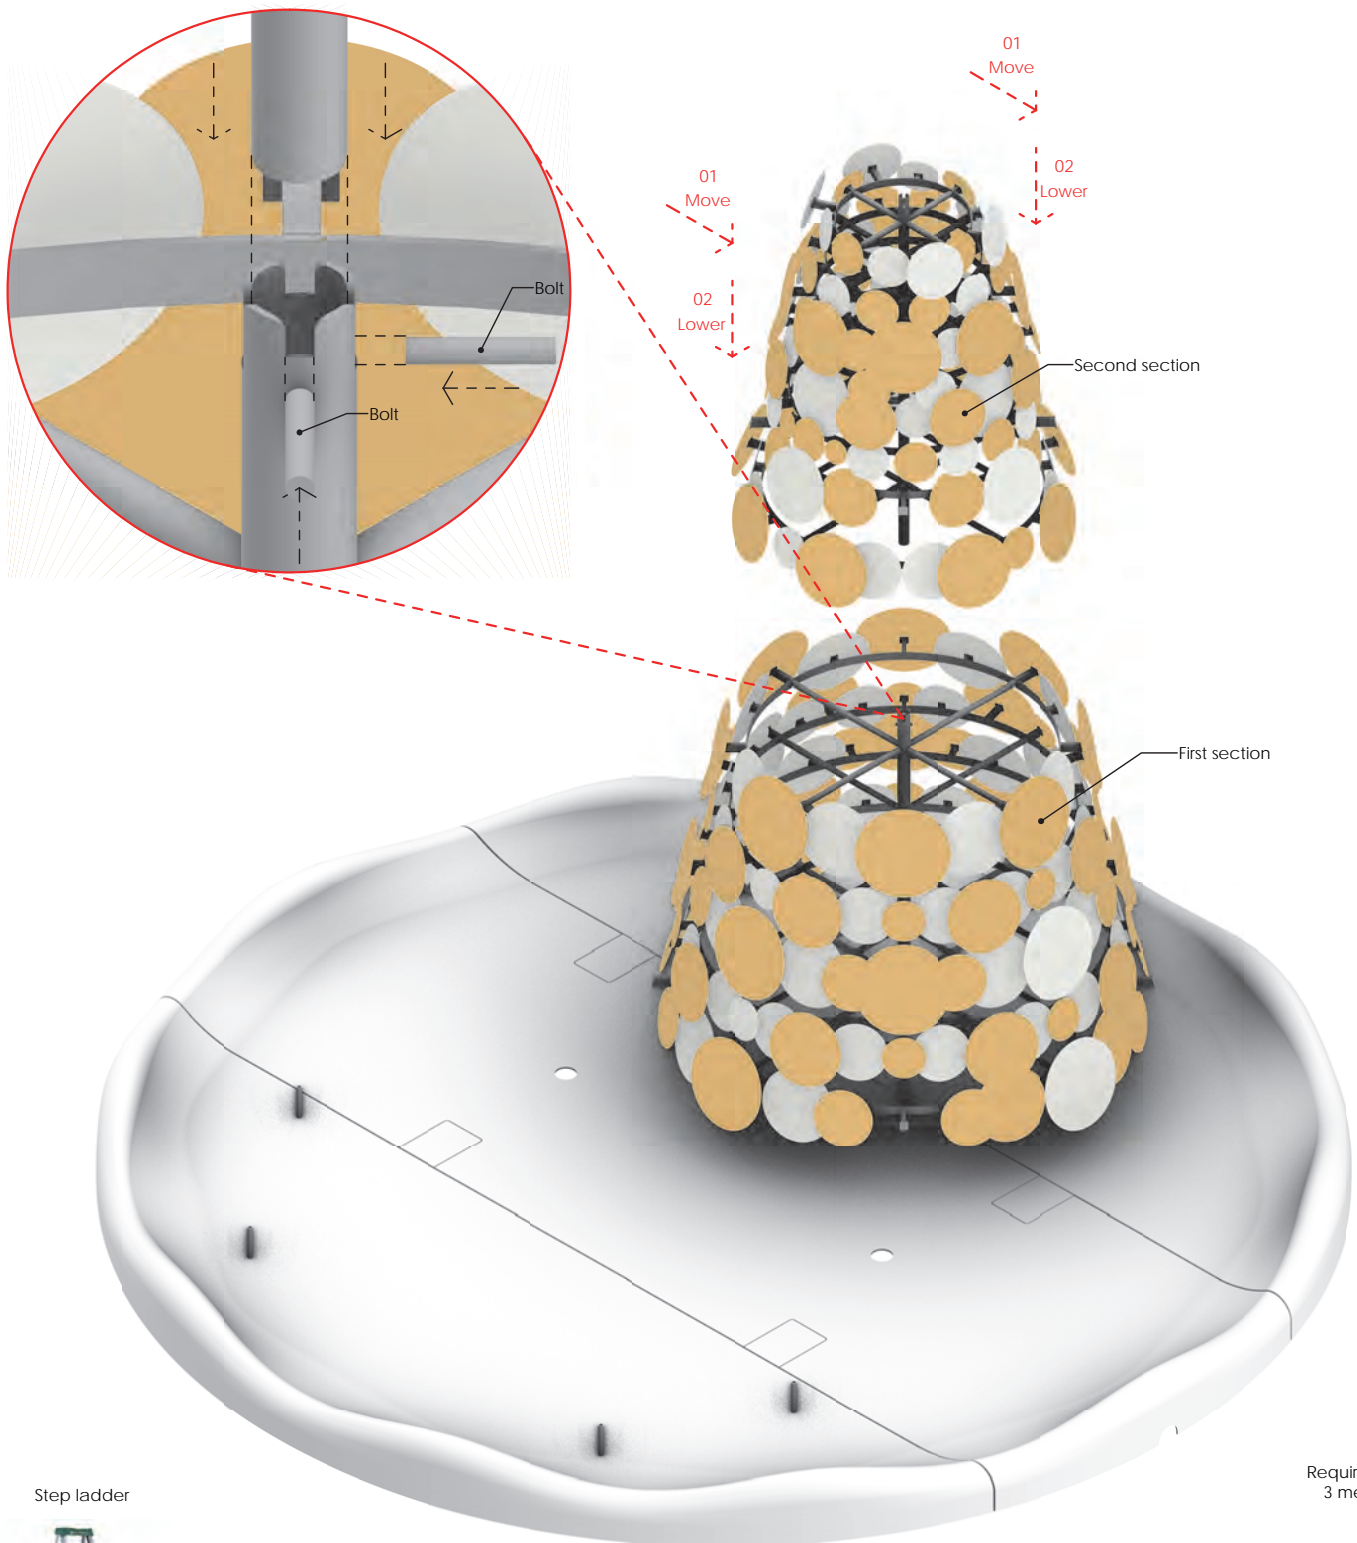

Required team
3 members

Slowly and steadily move the second part to its right position so it can be inserted into the first part

24

Verify the position of the second part
in order to insert the bolts

Step ladder

Required team
3 members

Carefully remove all the plastic of the third part using scissors/cutter

25

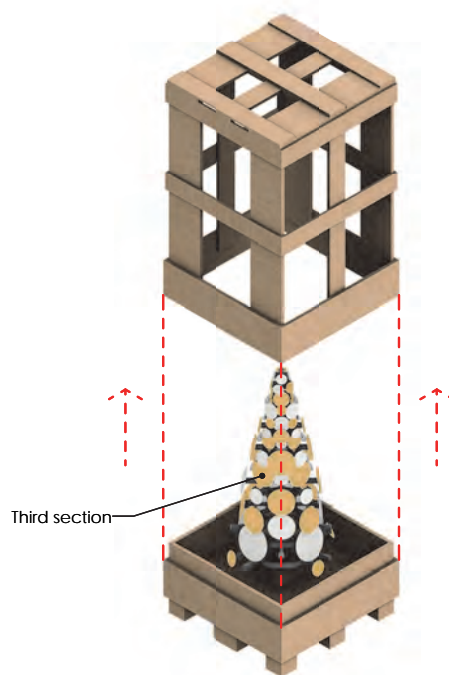

Required tool
Scissors

Unscrew and lift up the top of the wooden box

26

Required tool
Cordless drill

Unscrew the third part from the wooden base

27

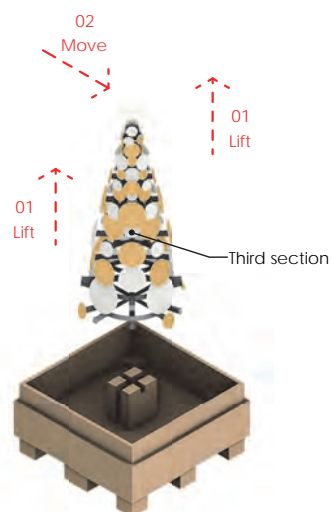

Required tool
Cordless drill

Using the required tools and equipment with a team of at least 3 people. Carefully lift up the third part of the tree

28

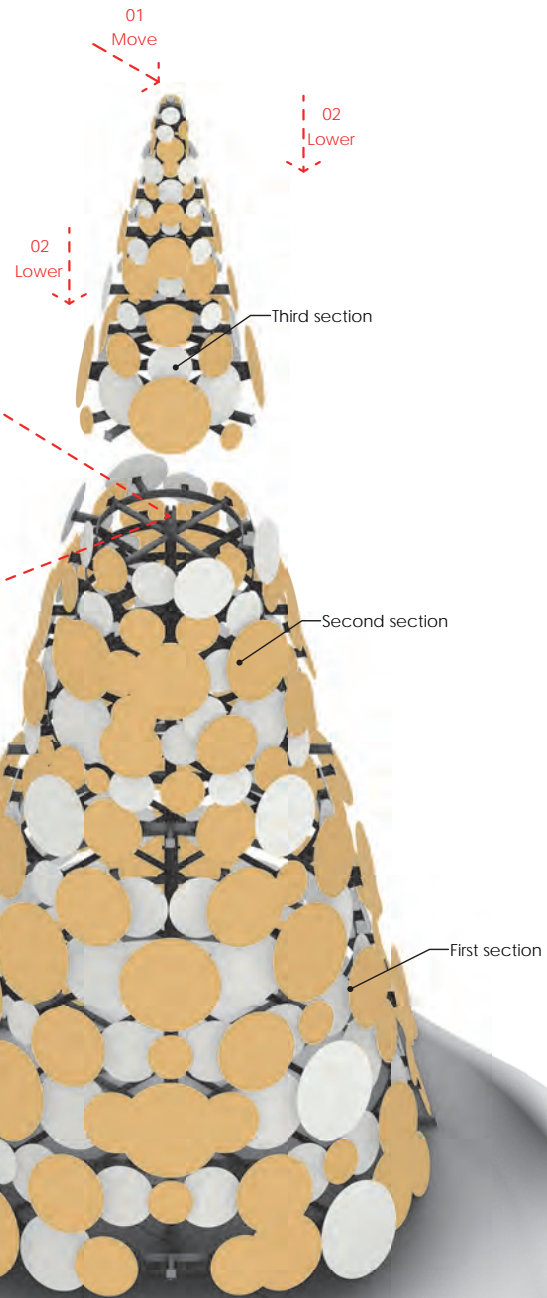

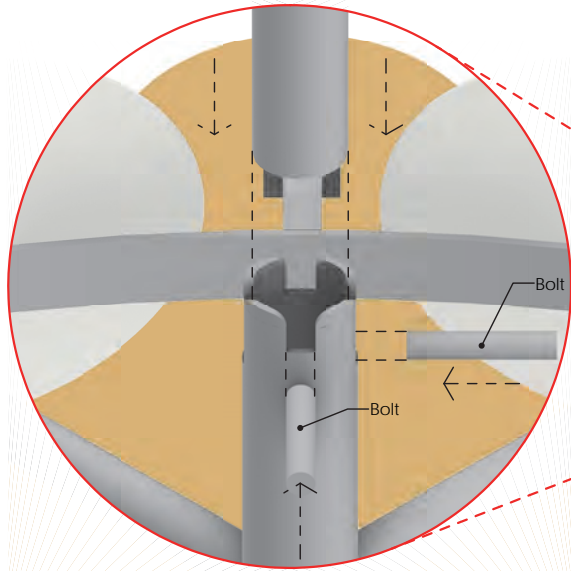

Required team
3 members

Slowly and steadily move the second part to its right position so it can be inserted into the first part

29

Verify the position of the second part
in order to insert the bolts

Step ladder

Required team
3 members

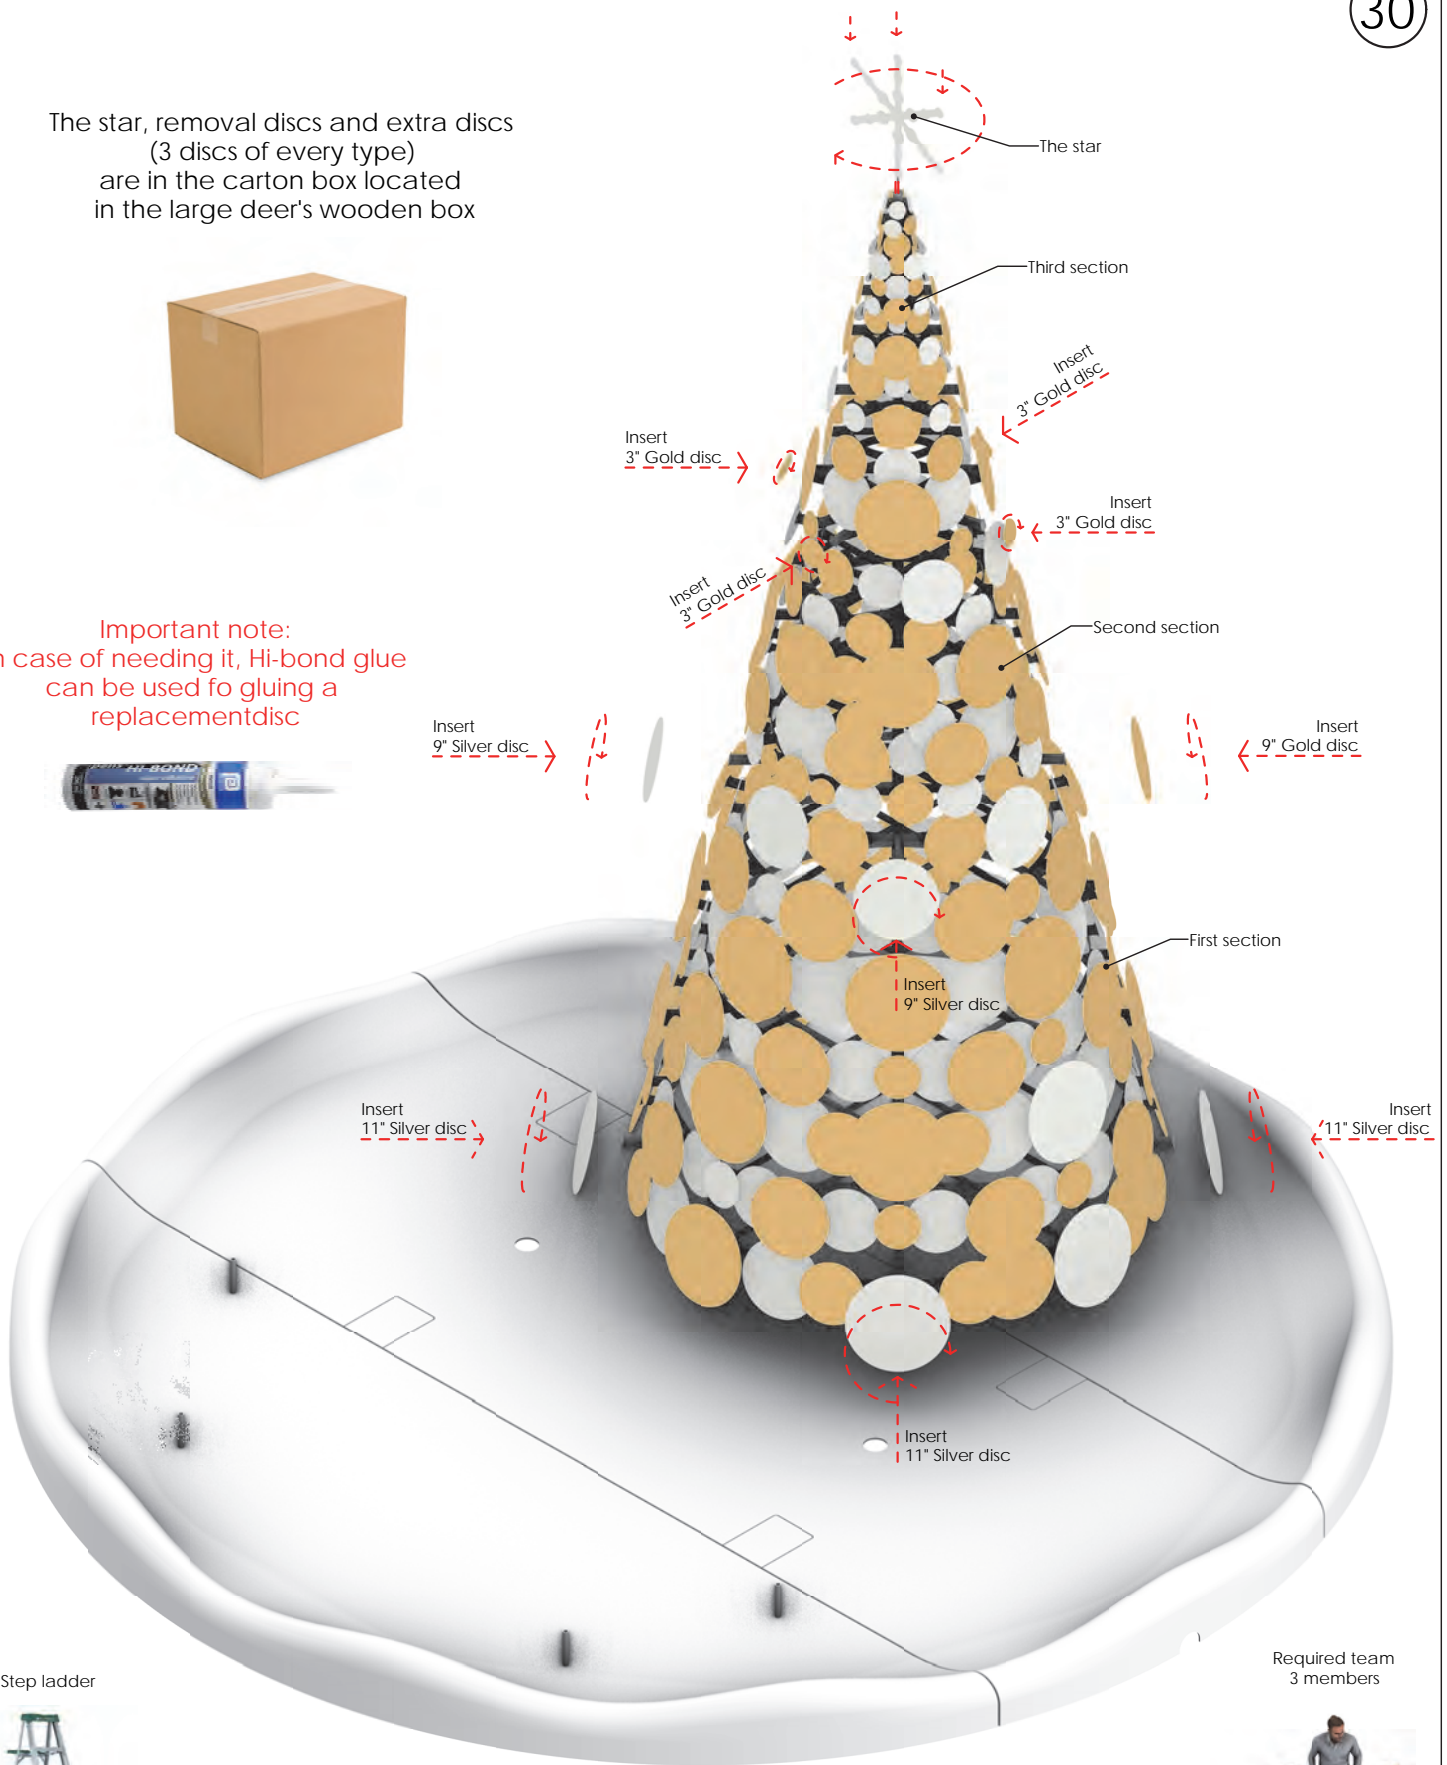

Insert and roll clockwise the removal discs and the star

30

The star, removal discs and extra discs
(3 discs of every type)
are in the carton box located
in the large deer's wooden box

Important note:
In case of needing it, Hi-bond glue
can be used fo gluing a
replacement disc

Step ladder

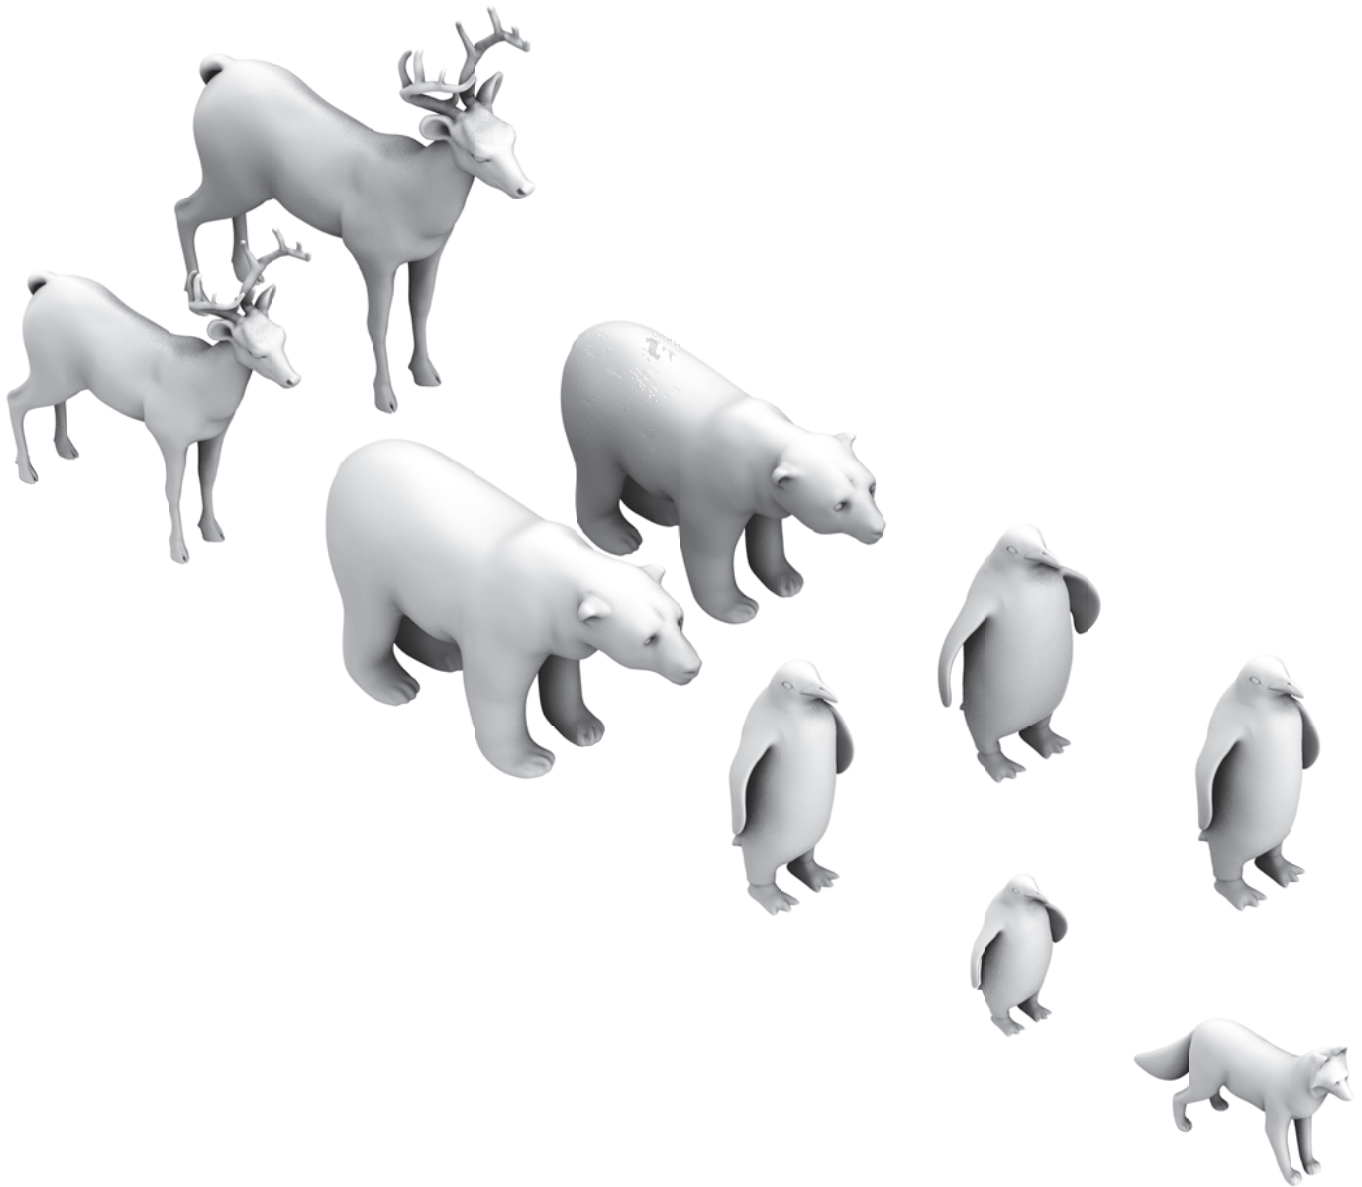

Required team
3 members

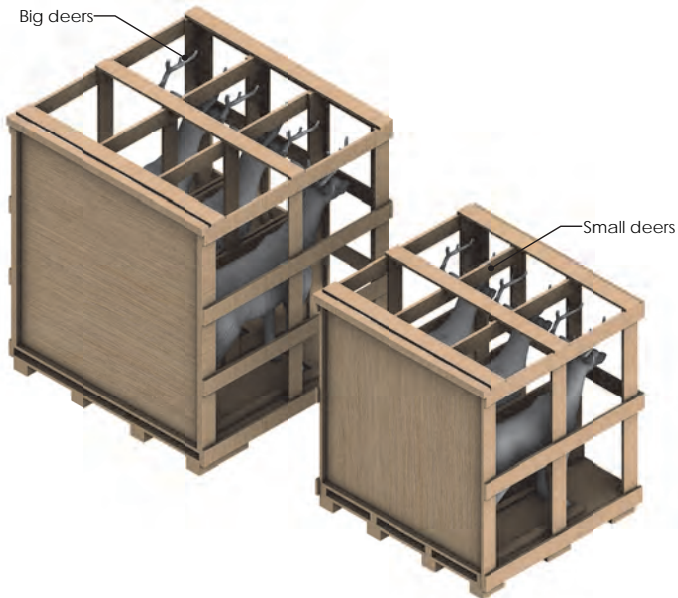

Chapter 4

Animals

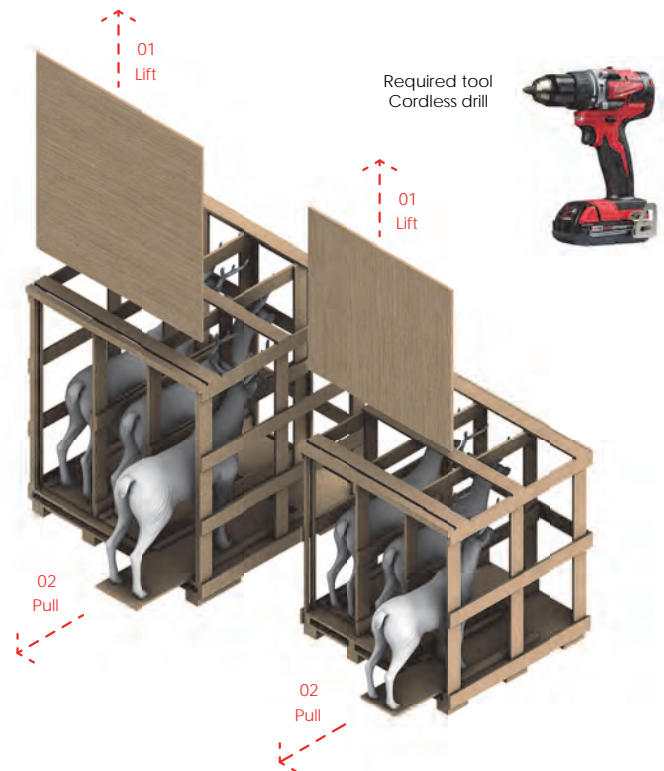

Locate the large and small deer's wooden box

32

Unscrew and lift up the door of the wooden box
Then pull out slightly a deer of each size
Note: The deers are each screwed into a wood plank, please pull them out using plank

33

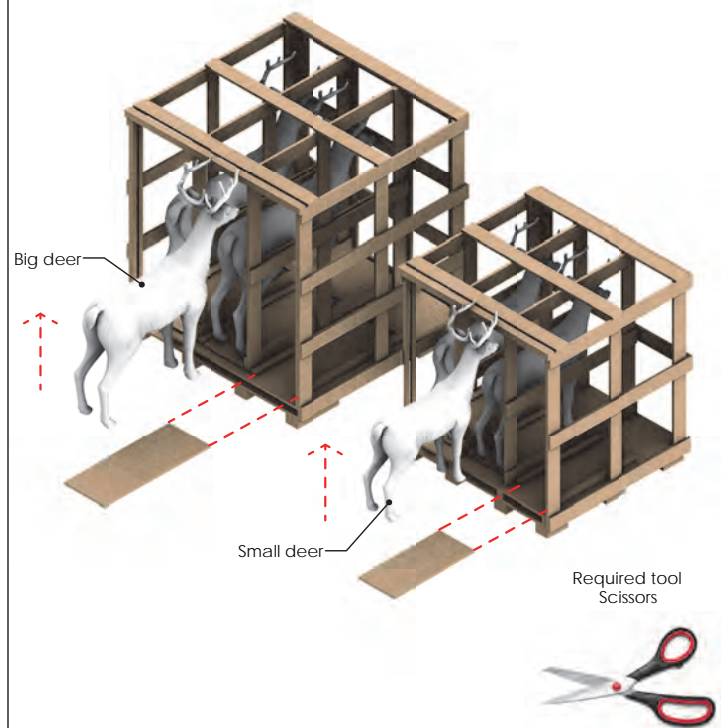

Unscrew the deer's legs from the wooden planks
Note: The picture is just for reference

34

Take the deers out of the wooden box
and carefully remove all the plastic
using scissors/cutter

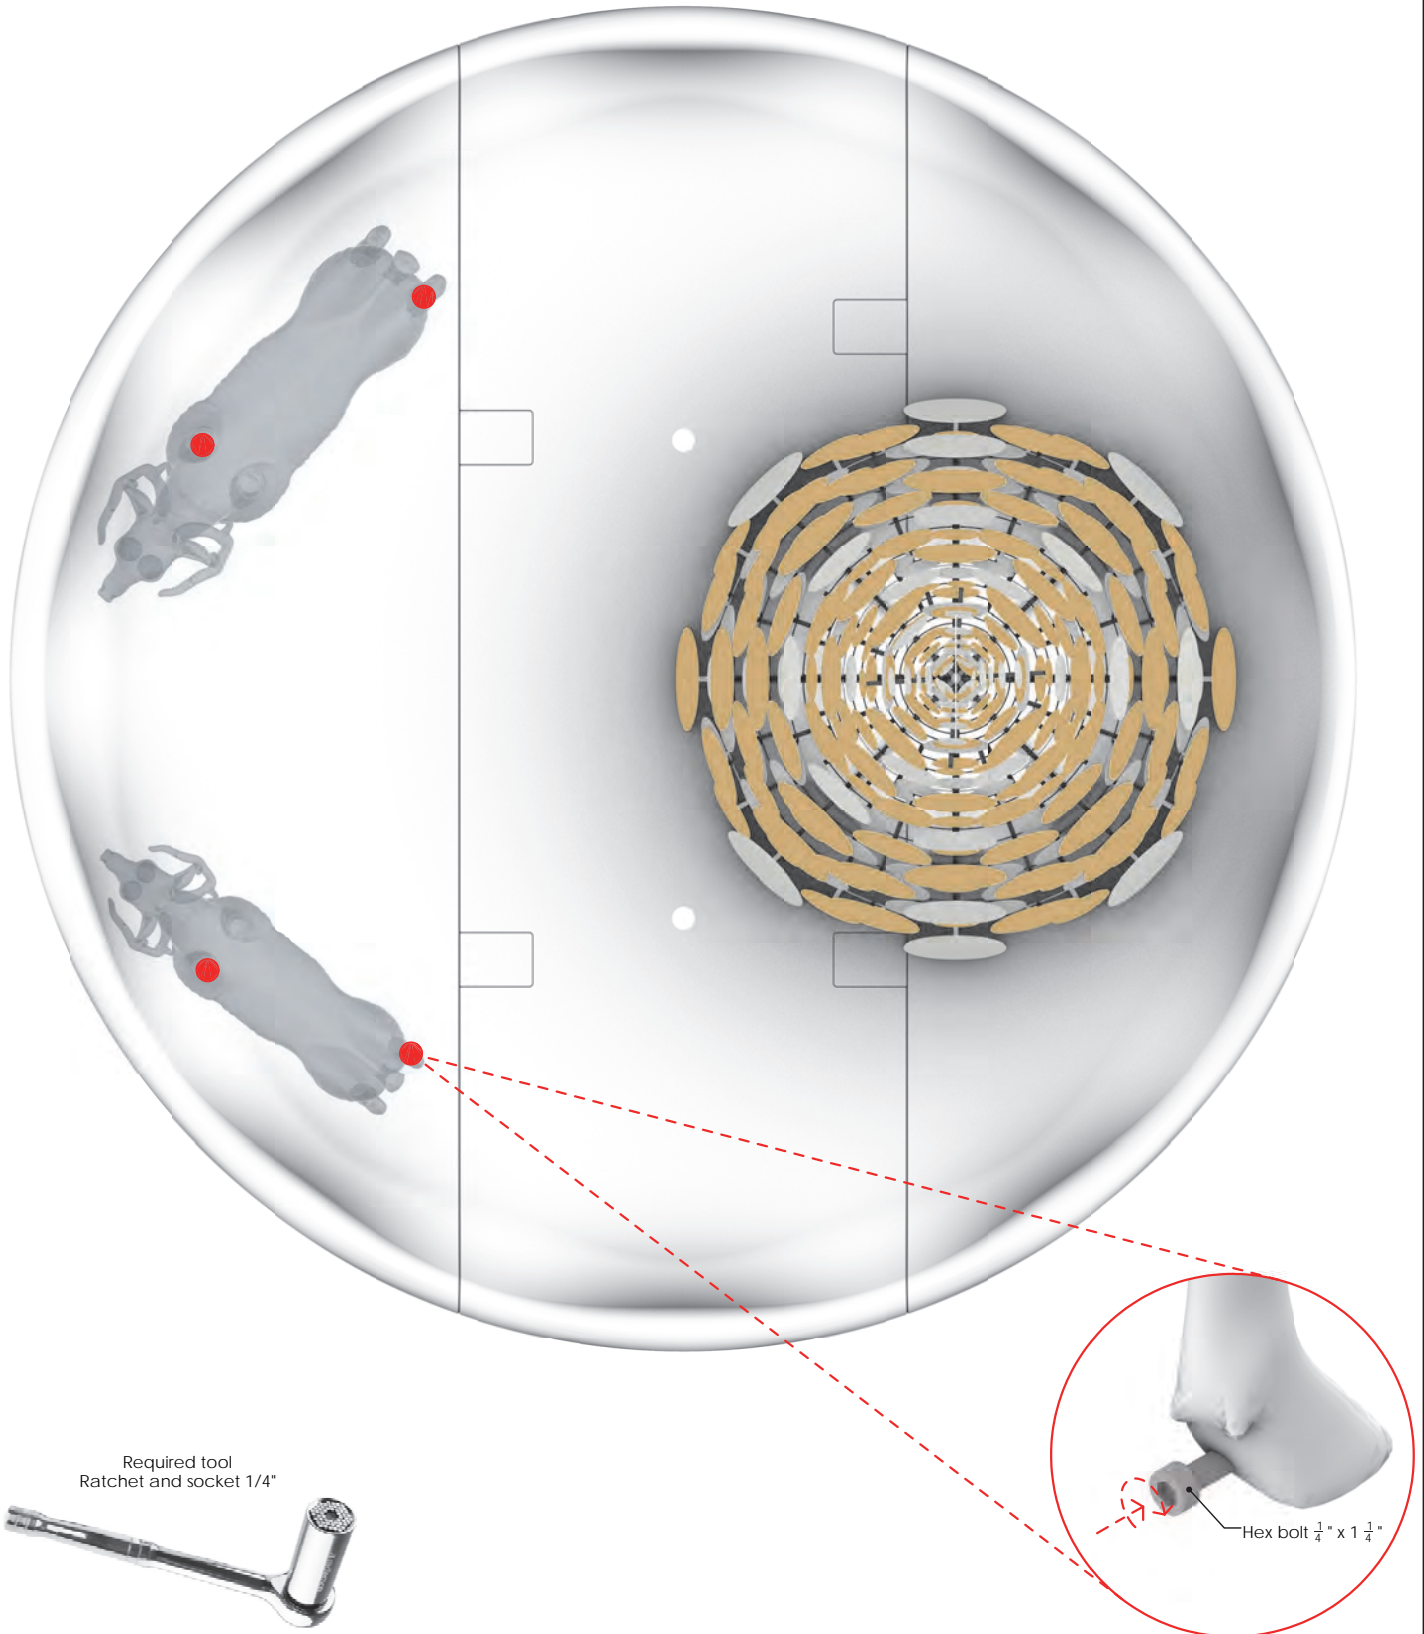

35

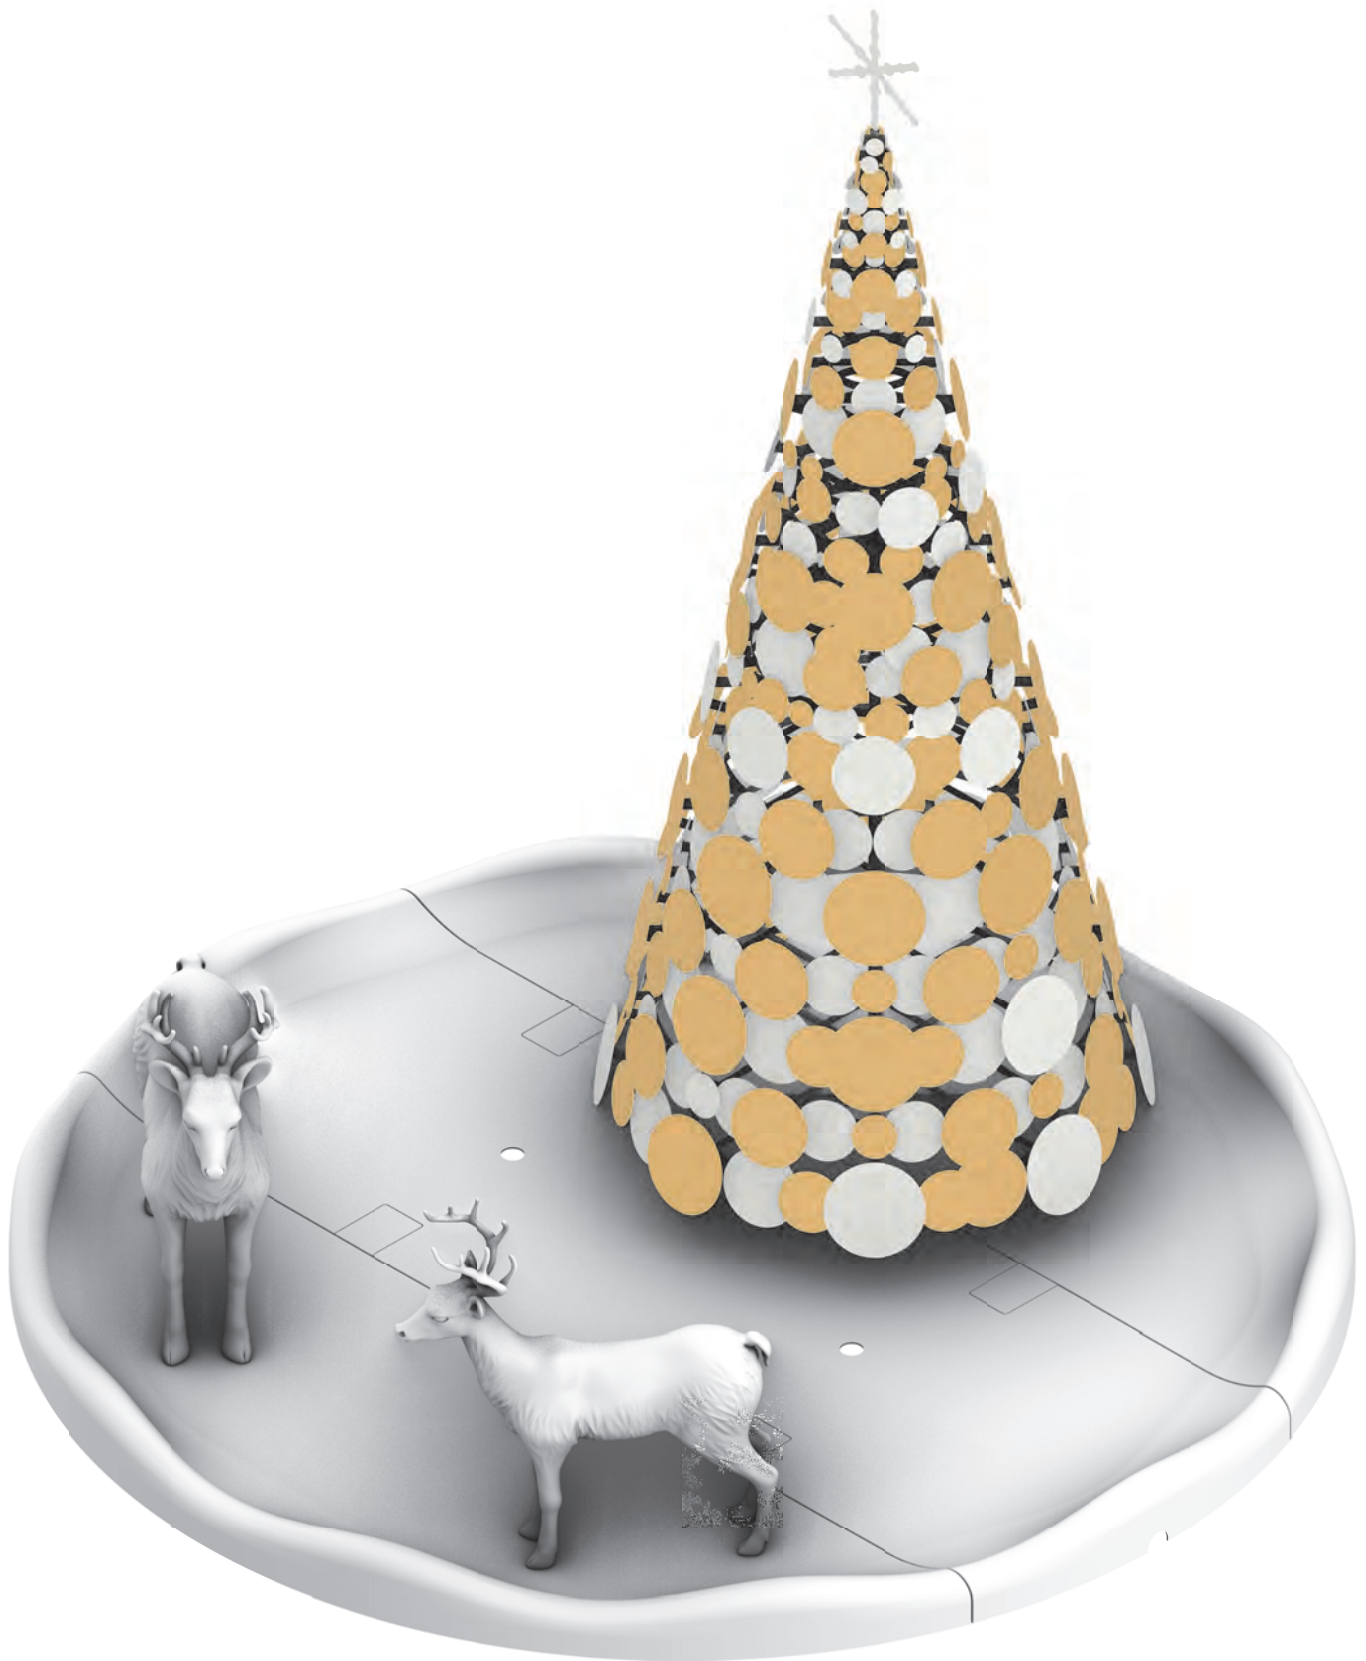

Island (a) - Deers

Place and secure the animals in the red points

36

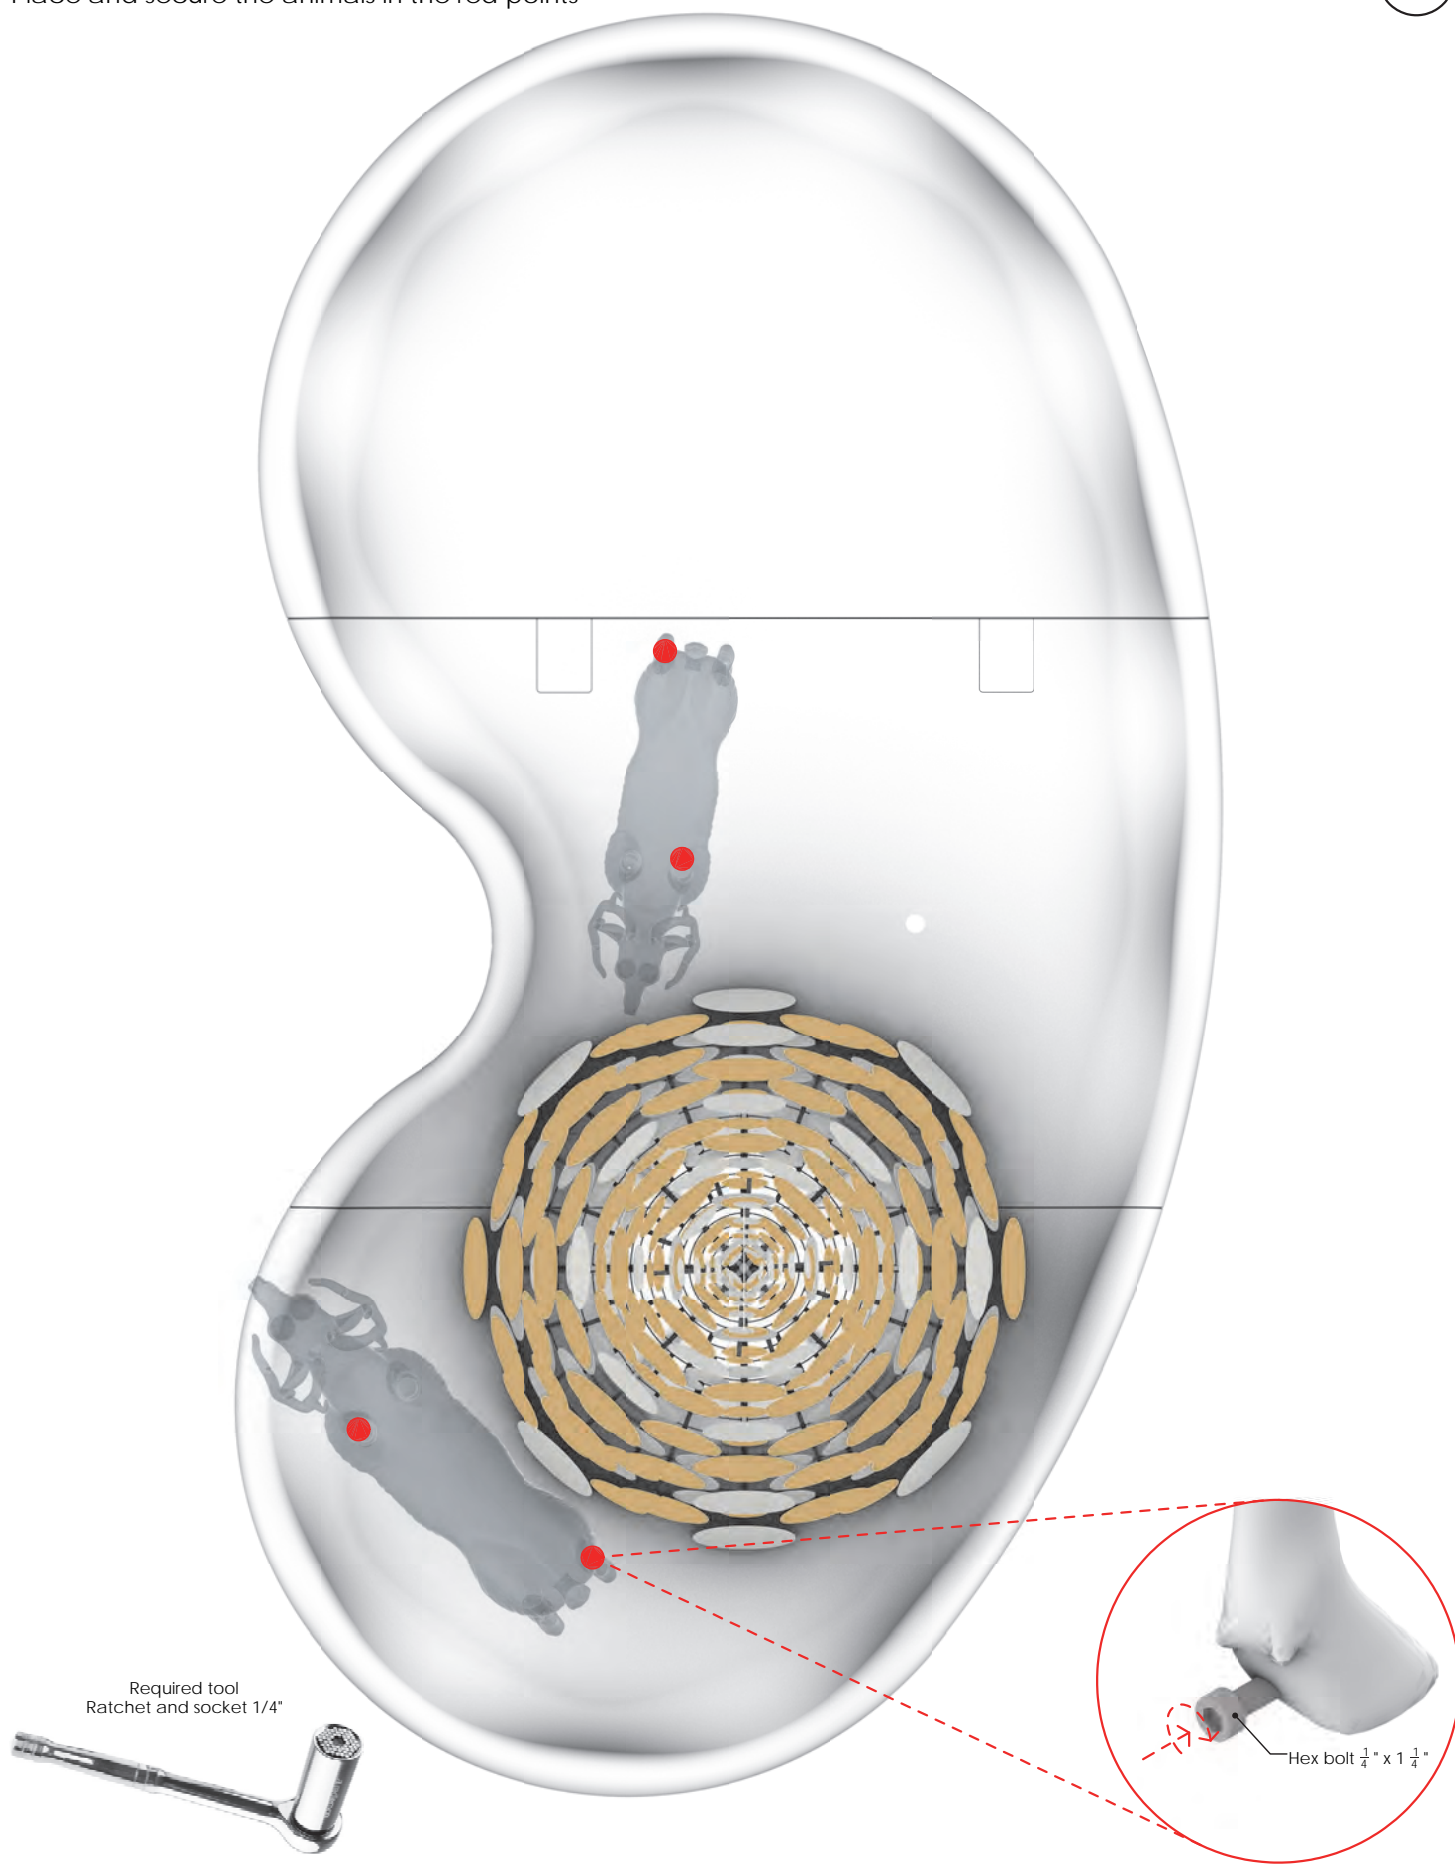

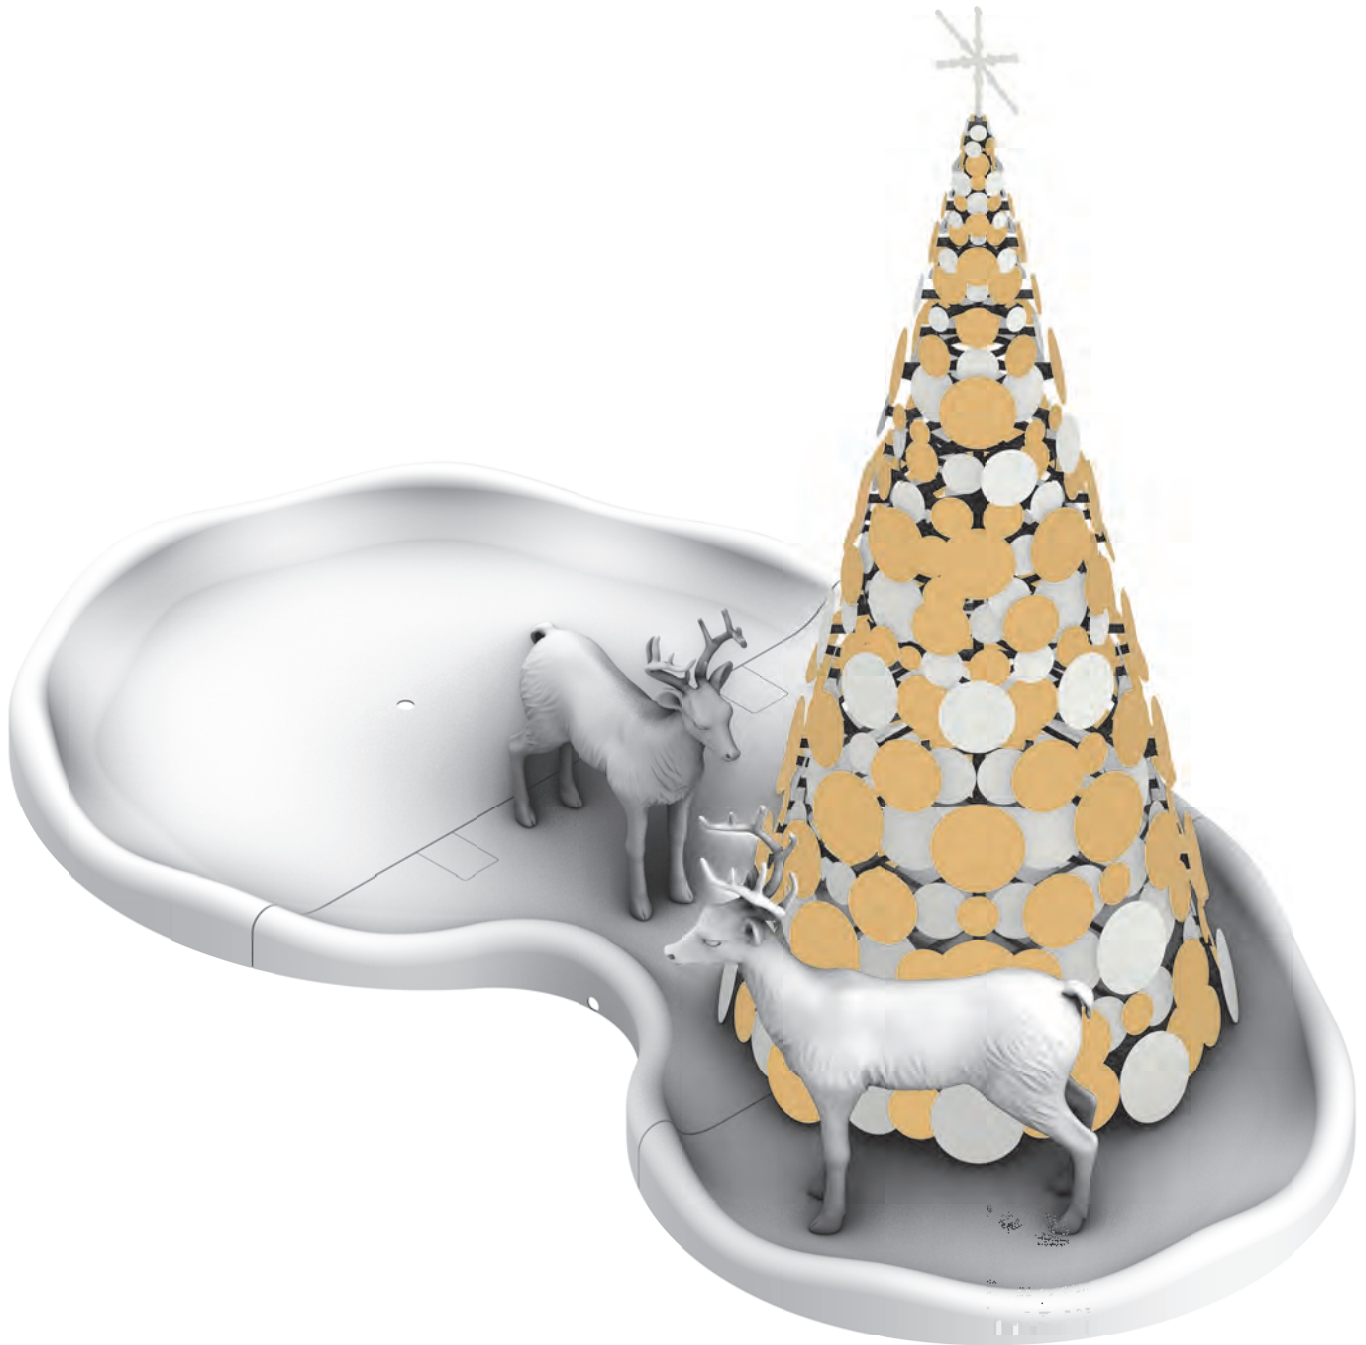

Island (b) - Deers

Place and secure the animals in the red points

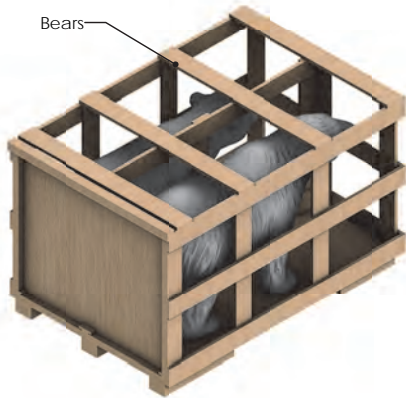

38

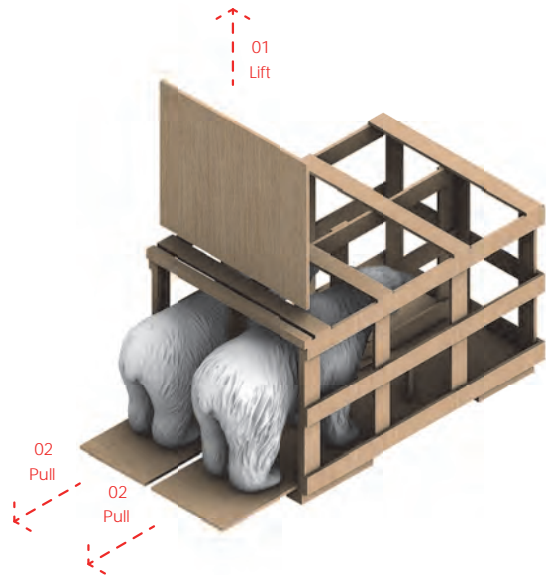

Locate the bear's wooden box

40

Unscrew and lift up the door of the wooden box
Then pull out slightly the bears
Note: The bears are each screwed into a wood plank, please pull them out using plank

41

Required tool
Cordless drill

Unscrew the bear's legs from the wooden planks
Note: The picture is just for reference

42

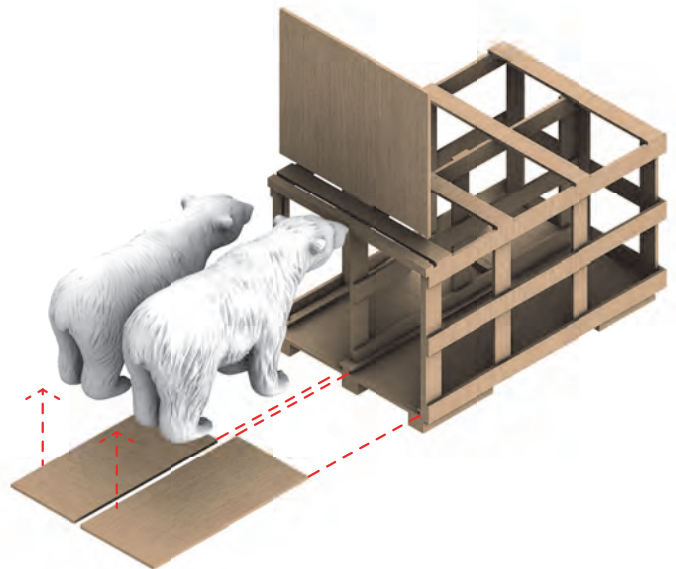

Required tool
Ratchet and socket 1/4"

Take the bears out of the wooden box
and carefully remove all the plastic
using scissors/cutter

43

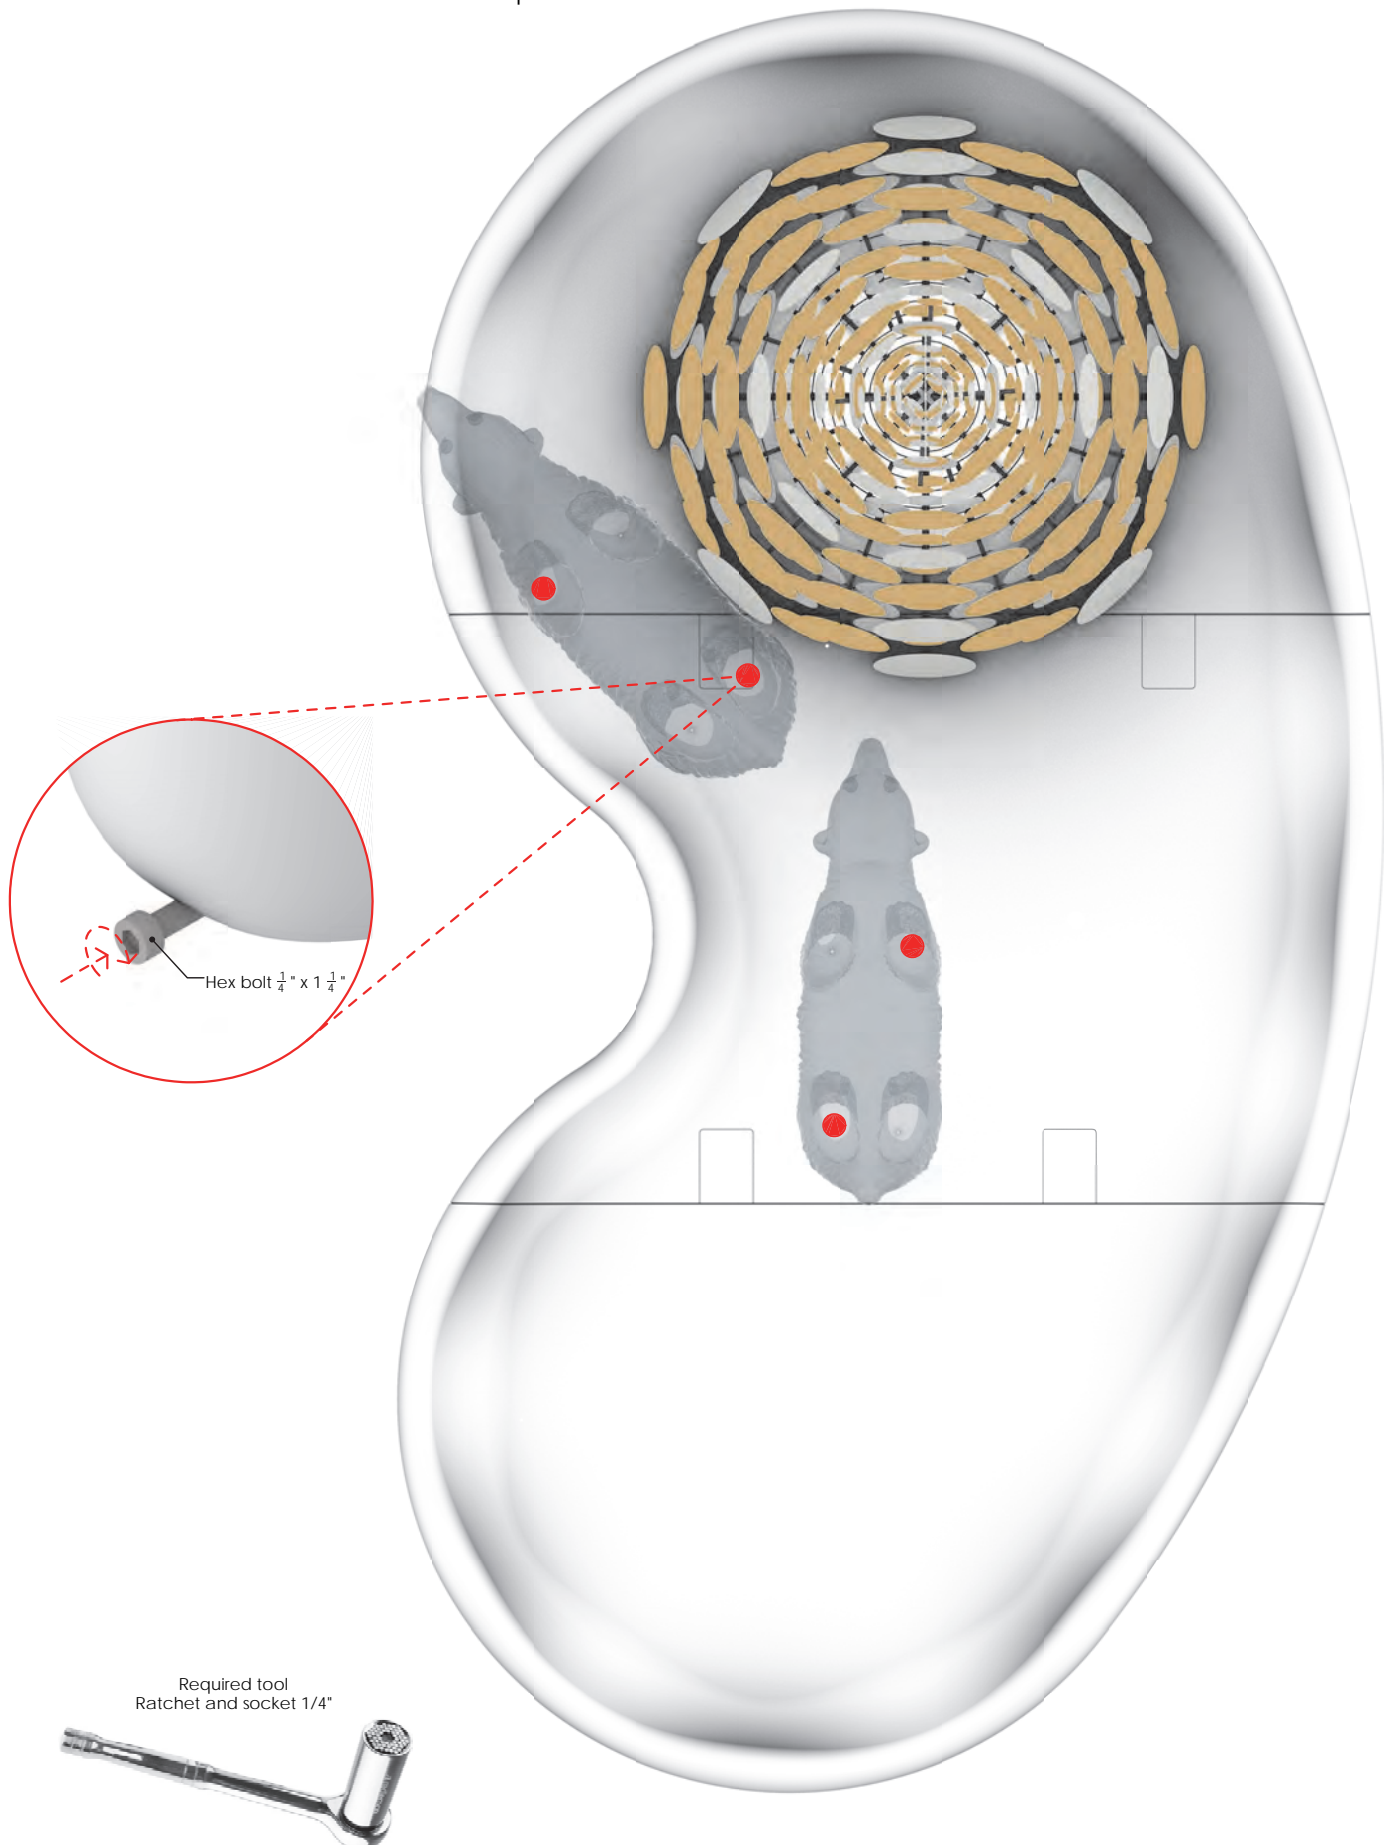

Required tool
Scissors

Island (b) - Bears

Place and secure the animals in the red points

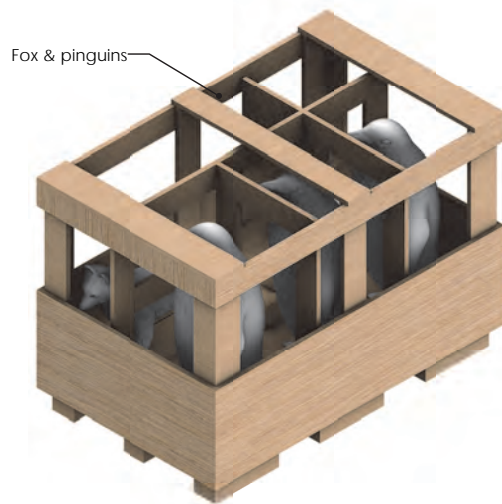

44

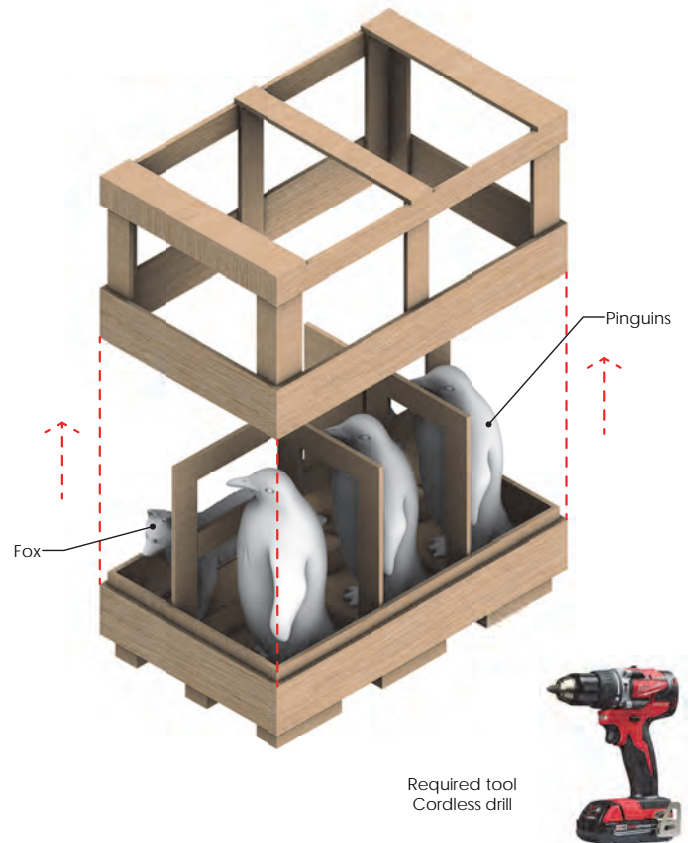

Locate the fox and penguin's wooden box

46

Unscrew and lift up the top of the box
Note: The fox and penguins are each screwed into a wooden plank

47

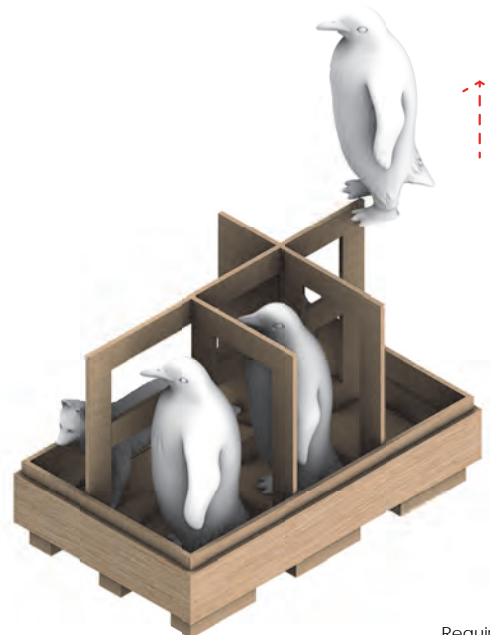

Unscrew the penguin's legs from the wooden planks
Note: The picture is just for reference

48

Take the penguins out of the box and carefully remove all the plastic using scissors/cutter

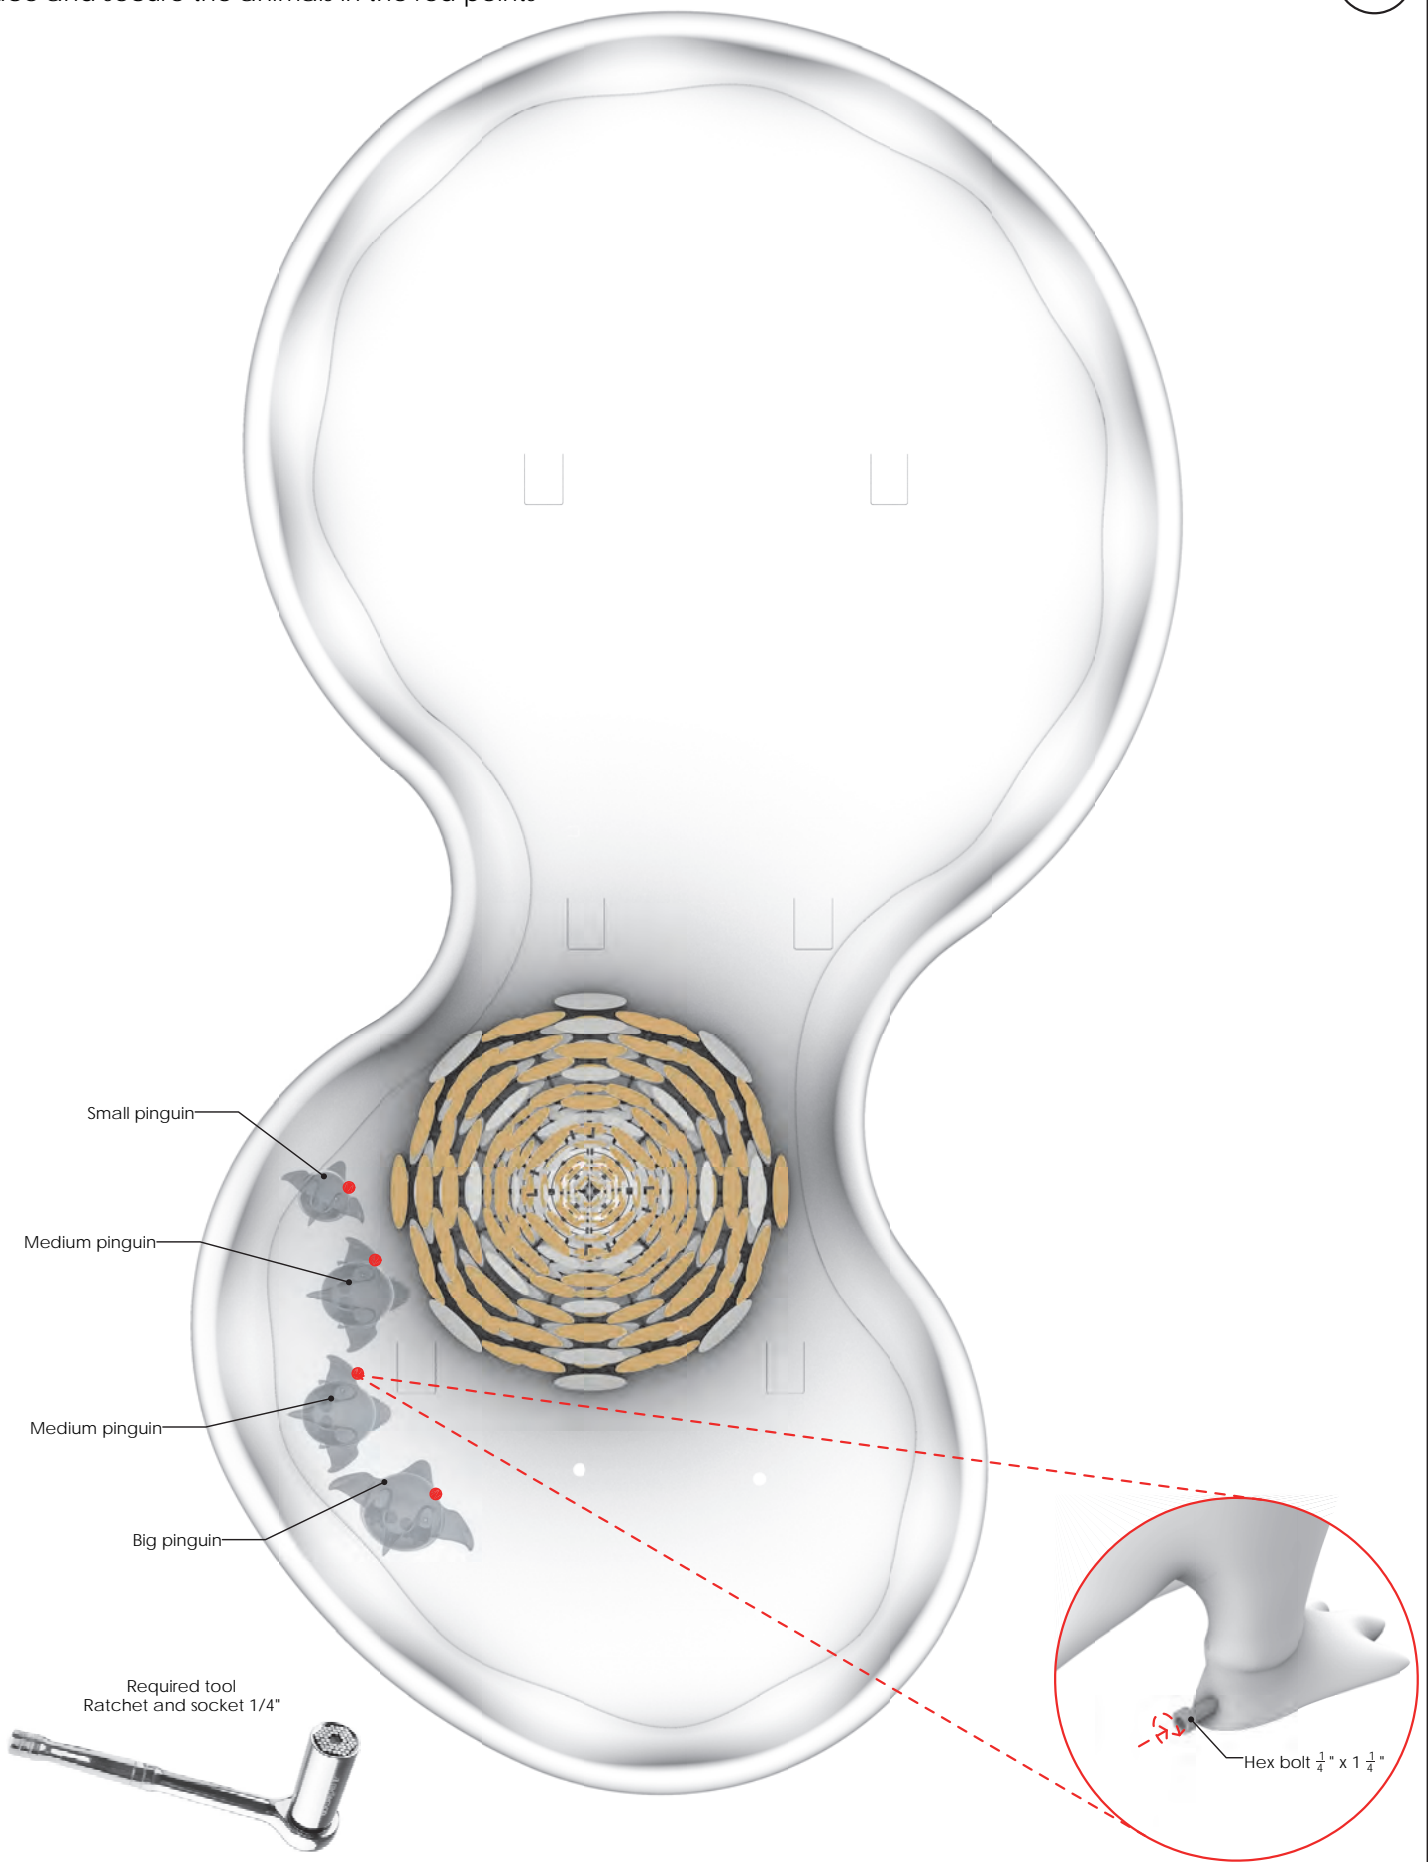

49

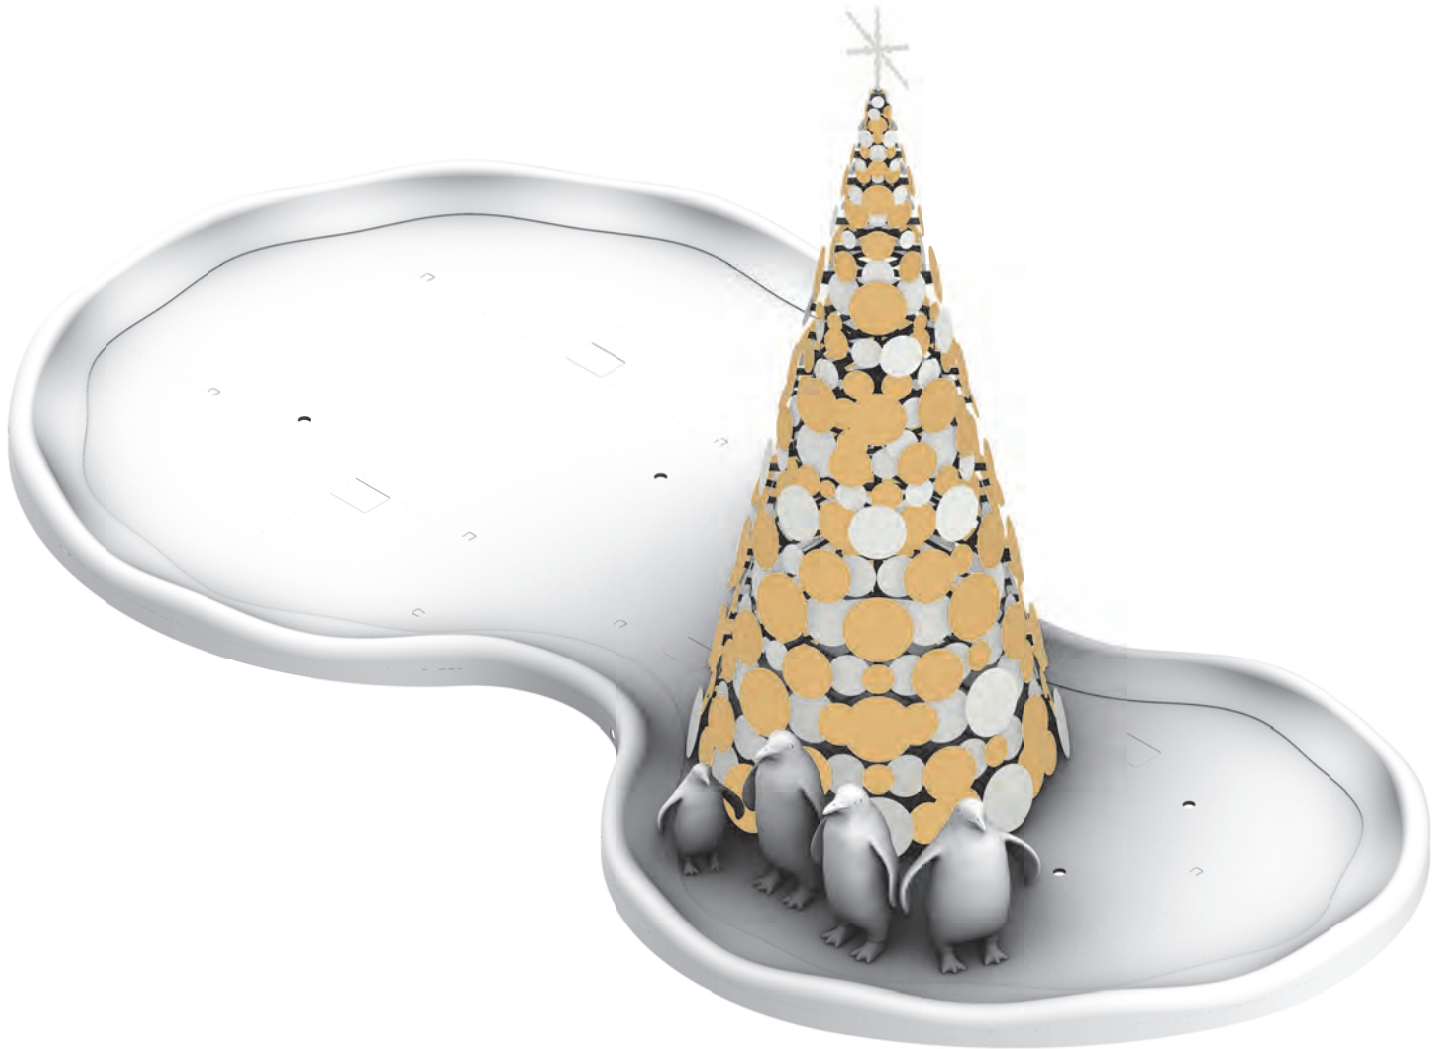

Island (c) - Penguins

Place and secure the animals in the red points

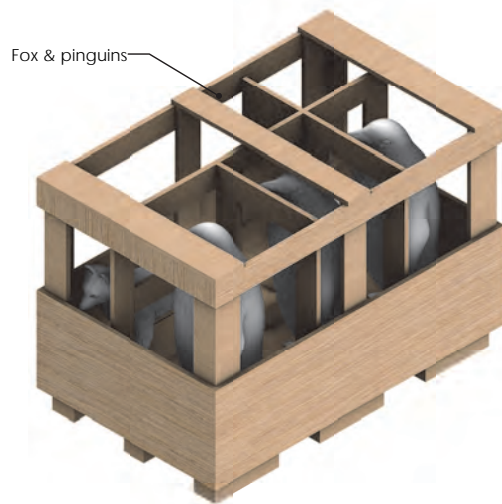

50

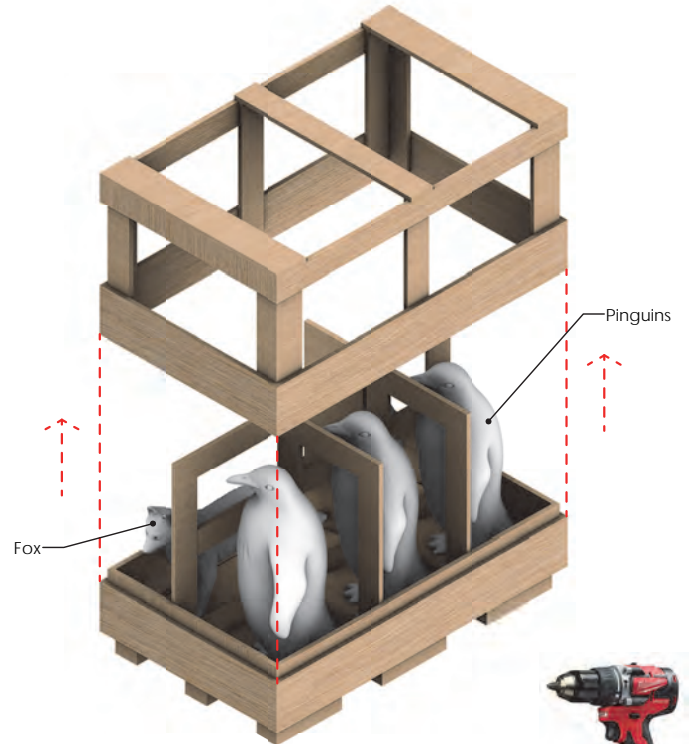

Locate the fox and penguin's wooden box

52

Unscrew and lift up the top of the box
Note: The fox and penguins are each screwed into a wooden plank

53

Required tool
Cordless drill

Unscrew the fox's legs from the wooden planks
Note: The picture is just for reference

54

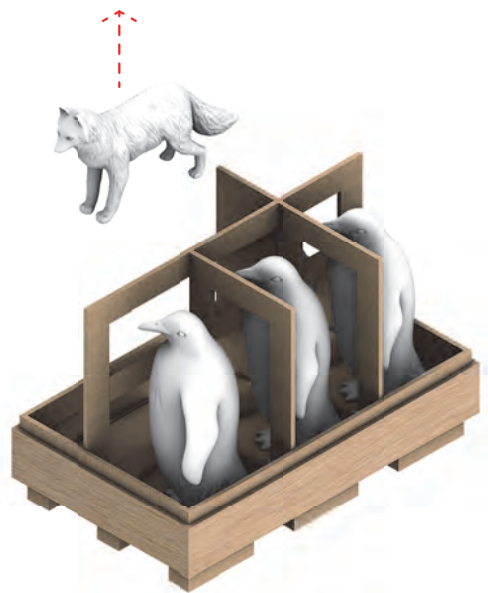

Required tool
Ratchet and socket 1/4"

Take the fox out of the box and carefully remove all the plastic using scissors/cutter

55

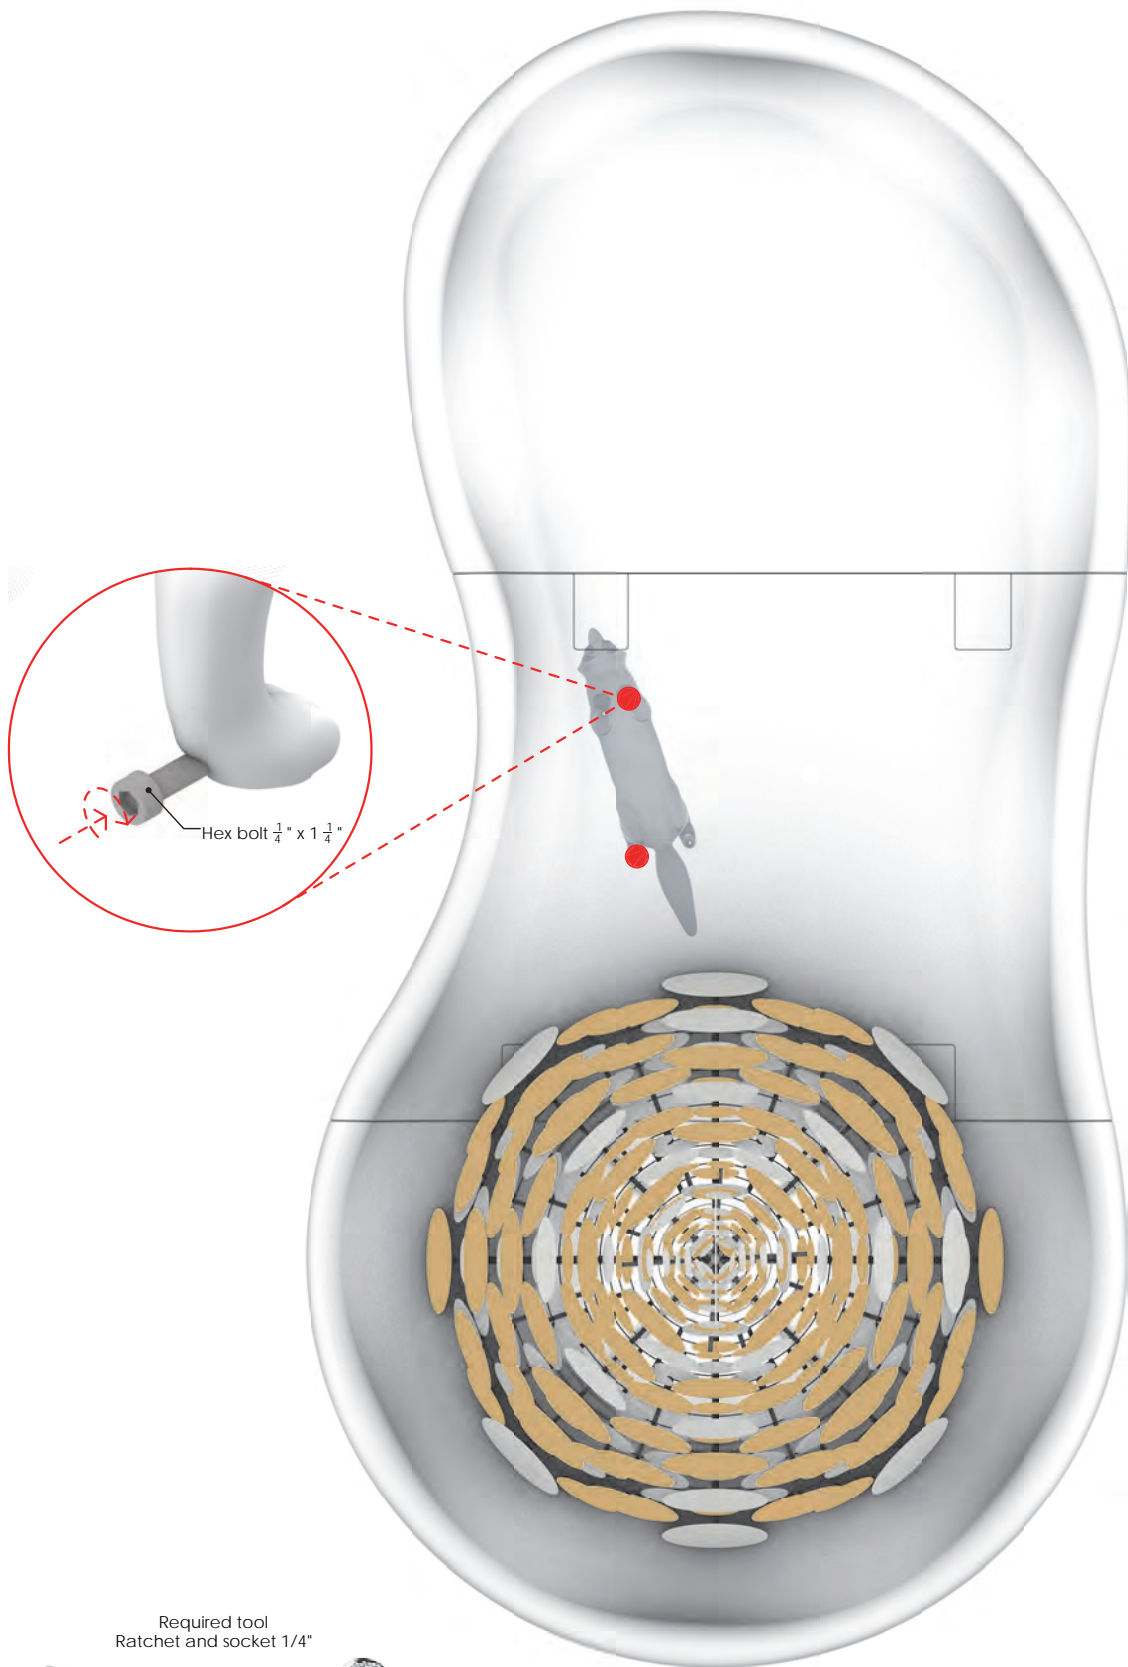

Required tool
Scissors

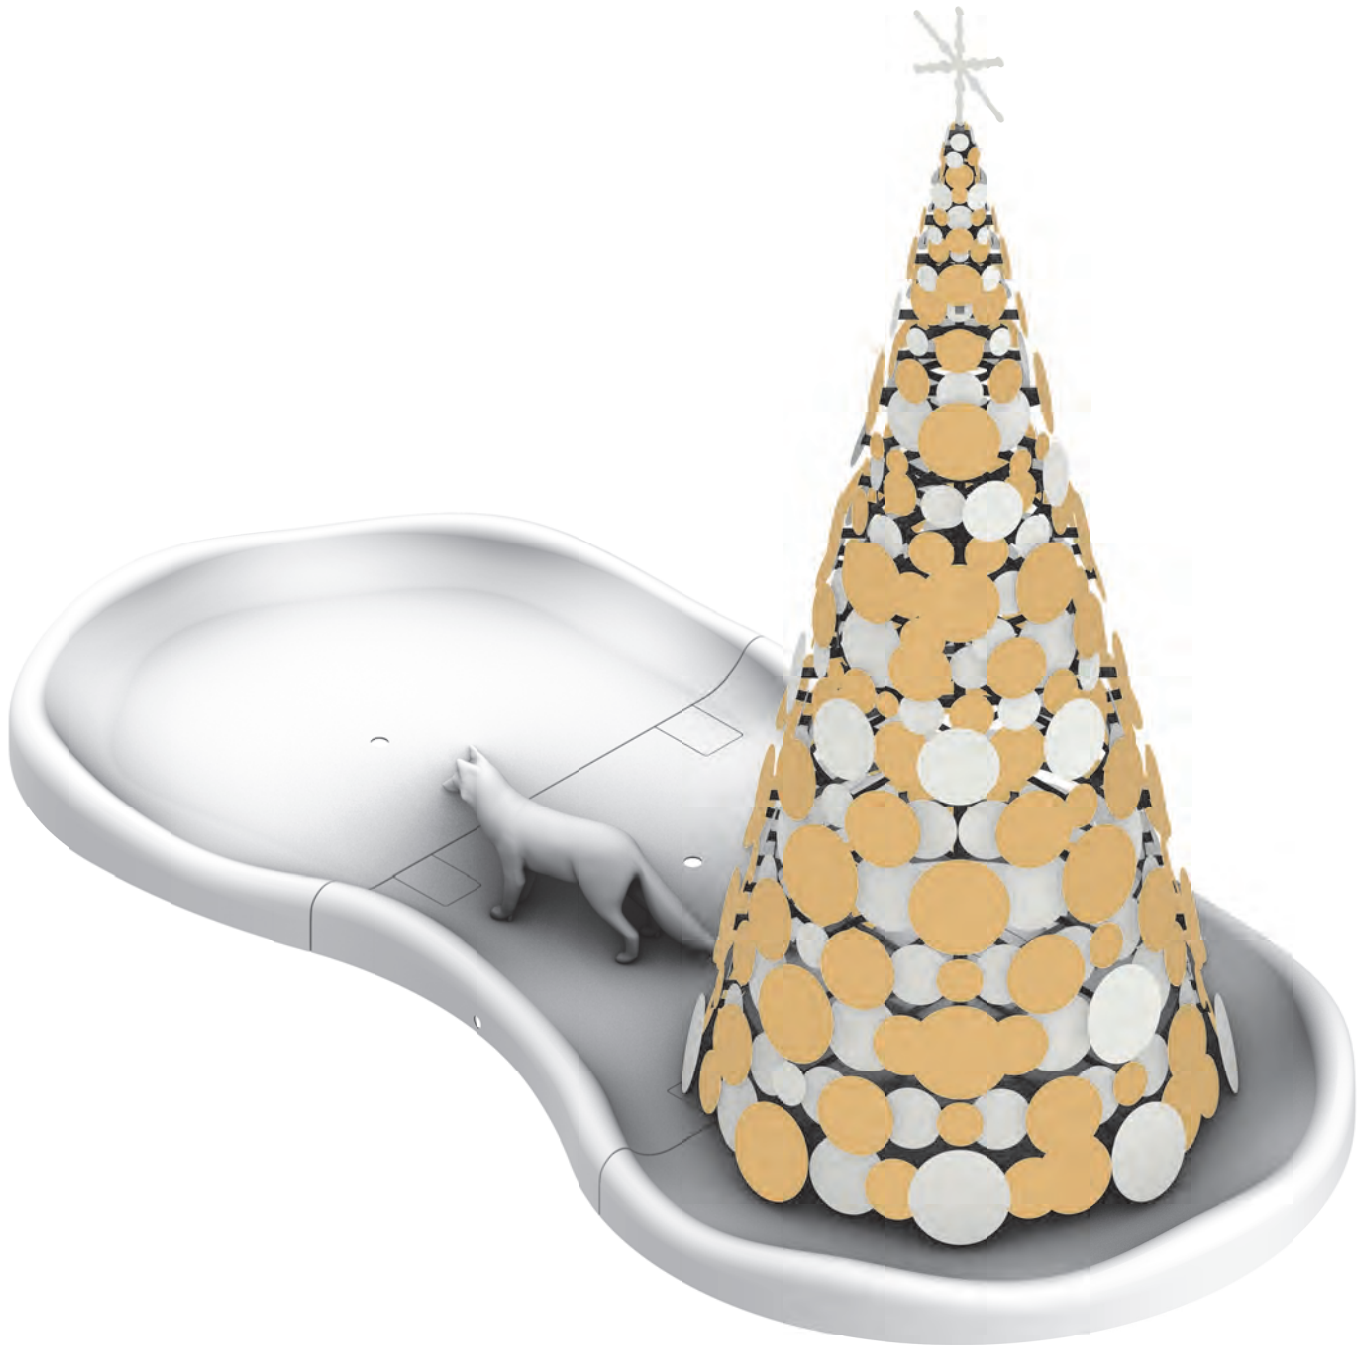

Island (d) - Fox

Place and secure the animals in the red points

56

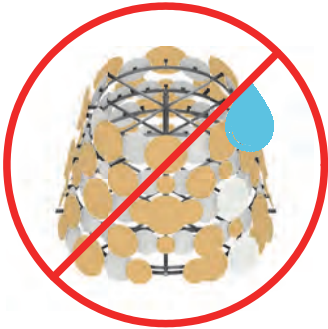

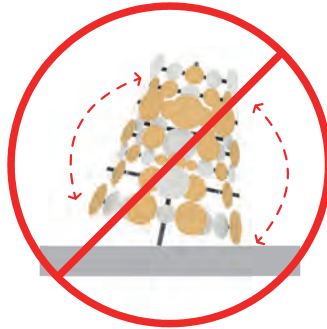

Safety Measures

Keep away from water

Do not drop

Do not lean on the wall

Do not lean on the floor

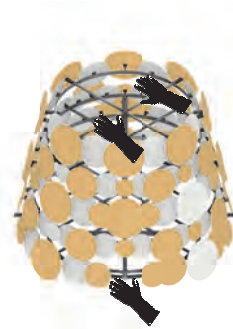

Do not leave outdoors

Do not add ornaments or accessories

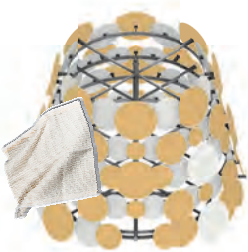

Only lift the tree by the metal structure

Move the tree with at least 3 people

Only clean the discs with a wet rag

Do not use cleaning/polishing products

Do not walk on the island

Do not sit/step on the border of the island

Do not sit/hang on the animals

Do not push or pull the tree

Do not punch or push aggressively the discs

Store the decorations in their respective wooden box
